

APPENDIX

About the Exhibitors

A.Taylor & Son (Leeds) Ltd – Stand C7

Established in 1864 A.Taylor is recognised as one of the UK's leading sub contract fabrication and machining engineers supplying high integrity bespoke solutions to a variety of industries including Nuclear new build and decommissioning.

It has recently launched a full design service through sister company Advanced Manufacture & Design Ltd.

Abakus Ltd – Stand C19

Abakus designs and manufactures a range of radiation tolerant lenses and optical systems for the worldwide nuclear industry. We have a range of standard products or can design something novel to meet your requirements.

Abbott Risk Consulting Ltd – Stand N15

Abbott Risk Consulting Ltd is an independent, British SME providing safety case and professional engineering services to the UK Nuclear Industry. We are pleased to be able to offer clients an independent, responsive, value for money and quality service, which has been demonstrated over many years working in the sector.

ACB – Stand D13

ACB is the UK's leader in radioactive material management, recycling and disposal for sealed and open sources. We have a Permitted non-nuclear site and more waste streams than any other UK based commercial organisation.

AECOM – Stand C20

AECOM is built to deliver a better world. We design, build, finance and operate infrastructure assets for governments, businesses and organisations globally. As a fully integrated firm, we connect knowledge and experience across our international network of experts to help clients solve their complex challenges.

AIS Training – Stand S13

AIS Training is a world-class skills and training company specialising in the energy sector. We deliver more than 300 courses from three training villages in Newcastle, Grimsby and Aberdeen. Including Welding, Scaffolding, NDT, Rigging, Working at Height and Confined Spaces. Discover more at training.aisgroup.co.uk.

Allerton Steel Ltd – Stand G11

Allerton Steel is a specialist heavy steel fabricator and machinist with an excellent track record. We work in various market sectors including the civil nuclear sector, predominately working on mechanical handling equipment. We offer a cost-effective manufacturing solution delivering to demanding deadlines and programmes.

Altran – Stand M8

Altran is a global leader in engineering and R&D services, providing expertise to Civil and Defence nuclear establishments. The company's capabilities include integrated safety & security (safety case development, peer review and engineering assessments), verification & validation, data science and cyber security.

AM Sensors Ltd – Stand L6

AM Sensors Ltd (AMS) is an engineering company specialising in optioneering, design, build and installation of control and instrumentation systems to the Nuclear Power industry. With particular expertise in process measurement, analytics and environmental monitoring, AMS can provide completely bespoke solutions to meet client needs.

Amari Copper Alloys Ltd – Stand G14

The largest ferrous and non-ferrous stocking company in Europe.

Full Project Management package.

Full material supply and documentation package.

Inspection Test Plans.

Non-Destructive and Destructive Testing.

Third Part Inspection.

Final Sign Offs.

Amec Foster Wheeler – Stand C12

Amec Foster Wheeler is working at Sellafield, Dounreay, Fukushima and Chernobyl. We draw on decades of experience and proprietary technologies to offer innovative solutions that minimise the cost and impact of managing waste streams. Our capabilities include dismantling, remote operations, radioactive waste processing and disposal, site restoration and remediation.

AMELEC – Stand B11

40 Years Quality Manufacturing and Supply of analogue Signal Conditioning / Process Monitoring & Control Instrumentation used throughout Nuclear industry sectors.

Seismic qualified Instruments for SIL 1, SIL 2 and SIL 3 rated Safety System Loop applications, covered by up to 10 Year Warranty.

Ansaldo NES – Stand D1

Ansaldo NES specializes in DFM, assembly, test, installation and commissioning of customised solutions for the nuclear decommissioning, defence, and nuclear new build markets.

Applied Photonics Limited – Stand i36

Established in 1998, Applied Photonics Ltd (APL) specialises in a technique known as Laser-Induced Breakdown Spectroscopy (LIBS) for remote characterisation of materials in hostile environments. APL's LIBS technology has been used in high radiation areas including ThORP, HLW Vitrification Plant and AGR reactor vessels.

Aquila Nuclear Engineering Limited – Stand F14

Created by industry experts, Aquila delivers mission critical engineering to Europe's nuclear and nuclear medicine industries. We offer a wide range of solutions from Concept to Turn Key, specialising in:

- Shielded Facilities
- Containment
- Remote Handling
- Packaging and transport

Together we are shaping the future of nuclear engineering

Arc Energy Resources Ltd – Stand R5

Welding Engineering Project Management provides innovative QG1 full supply work packages to the Nuclear Energy Civil, Defence, Decom markets, specialist fabrications in all alloys. Using mechanised TIG, Sub-Arc, MIG welding systems, hard facing PTA. CNC Machining, milling & turning all production supported by NDT teams.

Arco Ltd – Stand G1

Arco is the UK's leading supplier of personal protective equipment, workwear, and workplace safety solutions, offering a world class range of products. As Experts in Safety we are widely recognised provider of specialist advice, training and consultancy, locally and nationally.

AREVA – Stand H6

As a world leader in nuclear, New AREVA incorporates expertise from across the fuel cycle with unique owner: operator experience to offer innovative solutions to its clients. Its technical delivery business has operated in the UK for 40 years, providing expert consulting and engineering services.

ASKAMS Compliance Services Ltd – Stand L1

ASKAMS Compliance is a UKAS accredited asbestos management company providing a full range of asbestos services: management plans, gap analysis, surveying, testing/analysis, analytical services and UKATA training.

Aspire Procurement Training Ltd – Stand N3

We are a CIPS approved provider of procurement training courses and work with many people in purchasing, supply chain, contract management & buying roles.

Our tutors are all MCIPS qualified with global industry experience which results in students achieving some of the highest pass rates in the UK.

Assystem – Stand F16

Assystem is an international engineering and innovation consultancy employing over 4,000 professional energy and infrastructure engineering staff.

Assystem provides consultancy, engineering support and management services to the nuclear energy market, both civil and defence. We specialise in:

- Project and programme management
- Engineering design, build and commission
- Bespoke process machinery and robotic applications
- Engineering and management consultancy

Astute Technical Recruitment – Stand L13

ASTUTE Technical Recruitment focus on core sectors including; Power Generation, Nuclear, Renewable Energy, Waste Management & Water Treatment.

Atkins – Stand i32

Atkins is one of the world's most respected design, engineering and project management consultancies. We provide the highest level of expertise in nuclear engineering, project and site management, as well as market-leading technologies in waste management to the most challenging nuclear commissions worldwide.

Atomic Group Limited – Stand C18

Atomic Talent provides specialist search, contingency recruiting and resource management consultancy services within the nuclear sector. We are specialists in our field and our consultants take pride in the years of experience gained supplying into the industry and providing client-side resource management services.

Augean Plc – Stand J7

Augean Radioactive Waste Services (RWS), a business unit of Augean Plc, provide waste disposal services for Low Level Radioactive Wastes and Naturally Occurring Radioactive Material in the UK.

Our services support the decommissioning of the UK's redundant Nuclear Facilities, North Sea Oil & Gas, Medical Facilities and certain Industrial Producers.

Balfour Beatty Plc – Stand J3

Balfour Beatty is a leading international infrastructure group. We finance, develop, build and maintain innovative and efficient infrastructure that underpins daily life, supports communities and enables economic growth. We have more than 100 years of experience in delivering highly complex infrastructure projects.

Barron Ltd – Stand i19

Barron Ltd are a Cumbrian based Engineering Company specialising in the design and development of systems for the Nuclear decommissioning sector including "Bladecutter" sludge removal, hard heel deposit collection, "Hydrospyder" floating crane and the introduction of liquid nitrogen decontamination into the UK.

Beehive Coaching and leadership Development Ltd – Stand S3

Beehive is a company that specialises in developing the people skills that are so essential to the effective and safe operation of any business.

Skills that include:

- Coaching, for performance and safety
- Leadership
- Human Performance

BEL Engineering – Stand C23

BEL Engineering offer turnkey solutions to suit our customers' needs. In our recently refurbished facility we can mill/turn from 3mm to 40-ton fabrications. We also offer grinding, mechanical testing, treatments, assembly. Visit our website www.belengineering.co.uk

Belman-UK Ltd – Stand R6

Designer and manufacturer of metallic expansion joints, used to compensate for movement, either by expansion or contraction in pipe work associated with gas or liquid transport.

Areas of use include boilers, turbines, furnaces, HVAC.

Belman has been successfully operating in the nuclear industry both directly and through EPC's for more than a decade, with a series of significant projects in its reference list.

Bender UK Ltd – Stand M16

Provider of Electrical monitoring equipment to prevent critical power loss across systems and infrastructure.

BEPDT – Stand N23

BEPDT is a Joint Venture Delivering the Box Encapsulation Plant at Sellafield.

Berwick's Consultants – Stand S6

Berwick's is a leading provider of Emergency and Crisis Management consultancy in the nuclear sector. We work with site license companies, the regulator and suppliers to tailor responses precisely to every challenge, building capabilities that make a profound difference to the way an organisation performs.

BHR Group – Stand i15

BHR Group is a fluids engineering consultancy with expertise in mixing, separation and transportation. Our knowhow is used to address nuclear decommissioning challenges including sludge pond transfer, rheology measurement and floc retrieval. We also provide waterjet cutting services for remote structure size reduction and depressurisation.

Blackburn Starling & Company Limited – Stand G4

Blackburn Starling is a manufacturer of LV Power Distribution Systems (Motor Control Centres, Switchboards, Package Substations, Bus Ducts and Instrumentation Panels), with extensive systems integration capability (MIS/MES, SCADA and PLC programming).

Scope of supply includes design, manufacture, software programming, test, installation, commissioning, training and maintenance.

Booth Welsh – Stand M19

Bristol Robotics Laboratory – Stand i4

Bristol Robotics Laboratory (BRL) a comprehensive UK centre for robotics research. Our research is in robotics for unstructured high-consequence applications. We focus on shared control and immersive teleoperation. BRL is a consortium member of two substantial EPSRC funded projects investigating Robots operating in Nuclear Environments.

Britain's Energy Coast Business Cluster – Stand H2

Britain's Energy Coast Business Cluster (BECBC) is a private sector led organisation, with members from SMEs to global companies with business interests in Cumbria.

Member benefits include networking, promotion, knowledge sharing, specialist sector groups and relationship development with key stakeholders in the supply chain and Cumbrian economy.

Bureau Veritas UK – Stand E13

Bureau Veritas are leading providers of UK nuclear inspections and global leaders in testing, inspection and certification. We understand the challenges of Nuclear New Build (NNB) and deliver a range of services that help all actors in the nuclear industry demonstrate their compliance with regulations.

Business France – Stand F11

Business France - French Trade Commission promotes trade development between France and the UK. It offers a wide range of services to French companies, to assist them with their commercial development in the UK as well as helping UK companies to set up in France.

C&P Engineering Services – Stand N2

C&P's integrated E&I services provide the following support on Nuclear projects:

- LV Electrical Services
- Instrumentation Installation
- Calibration & Maintenance Services
- Hazardous Area Inspection Verification, Installation & Consultancy Services

Cabinet Office SME Panel – Stand J6

Members of Government's SME panel will be joining CCS for the day. They are a group of 24 SMEs who advise government on how to achieve its aspiration of spending one pound in three through procurement with SMEs by 2022.

Cairnhill Structures Ltd – Stand M15

Cairnhill Structures provide SOLUTIONS IN STEEL to the Nuclear Industry, comprising In House Design, Fabrication and Installation. We are CE Marked to Execution Class 4.

Contact - Jack Sanderson OBE

Email - Jack@cairnhillstructures.co.uk

Website - www.cairnhillstructures.co.uk

Calder Engineering Ltd – Stand N20

Calder Engineering have a proven track record of delivering engineering solutions and services to the Nuclear sector since 1988. Specialising in fabrication, coded welding, machining, installation and commissioning.

EFFICIENCY / SAFETY / RELIABILITY

Cape Industrial Services Ltd – Stand B18

Cape is a leading provider of safety-critical industrial services within the nuclear, energy, and natural resources sectors, offering a wide range of multi-disciplinary, nuclear decommissioning services. Cape's nuclear professional operations mobilise large numbers of SQEP (white / blue-collared) personnel on operational and end-of-life nuclear assets.

Capita - Nuclear Works – Stand P5

Capita Resourcing is the provider of agency workers to the NDA estate, with a proven track record of delivering niche/volume resource through our experienced recruitment professionals.

Capula Ltd – Stand B4

Capula is an independent systems integrator with over 45 years' experience in the nuclear sector. Our automation control and real-time IT solutions assist clients with diverse nuclear application requirements in areas such as decommissioning, fuel production, nuclear generation and defence enabling them to optimise their research, design, manufacturing and maintenance operations.

Catax – Stand A5a

We work with SME businesses to maximise the R & D Tax relief they can claim from HMRC. We are well established in this specialist field and many SMEs are not aware of the beneficial effects on cash flow a successful claim can make.

Cavendish Nuclear – Stand N13

Cavendish Nuclear is the UK's leading supplier to the nuclear industry. We bring together much of the UK's rich nuclear heritage to create one of the largest specialist nuclear services organisations. Our heritage dates back to the earliest days of nuclear research and development.

CEMAR – Stand B15

Keep it simple with CEMAR®, the cloud-based contract event management and reporting solution for NEC® and other forms. Trusted by over 550 organisations across £50bn of strategic infrastructure projects and facilities management.

Centre for Leadership Performance – Stand G15

A dynamic social enterprise widely recognised for its collaborative programmes, CforLP works with companies and organisations across the nuclear sector in Cumbria and beyond, delivering proven ROI through pragmatic support for managers and leaders at all levels who need to improve their skills and knowledge.

CINC – Stand R2

The Nuclear Industry Cluster of Cantabria (CINC) is a business organization born as a meeting point of joint cooperation between the different agents with presence in the nuclear sector: University, Designers, manufacturers of equipment and components, technological centers and service providers with the objective of answering to the new technological challenges of the sector.

CLEARNORTH Recruitment Ltd – Stand E12

Recruiters of choice for nuclear construction and engineering companies UK wide, CLEARNORTH Recruitment are an agile SME that offers a CLEARLY Different recruitment experience.

We find talented people who are within the market not on the market. Why don't you come and see how on stand E12?

Clicks and Links Ltd – Stand i26

Clicks and Links Ltd specialises in immersive technology. We've been focussing on bringing the exciting potential of collaborative virtual reality to new industries. We've done work with cities, large infrastructure projects, and nuclear decommissioning, but also immersive training experiences, (see www.clicksandlinks.com)

CLM Industrie / ETNA Industrie – Stand B5

CLM Industrie: Designer-manufacturer of bespoke mechanical equipment for the nuclear industry. Expertise: Nuclear containment and bespoke mechanical tools and equipment.

ETNA Industrie: Manufacturer of fluid regulation components (Safety Valves, Back Pressure Valves, Surplus Valves) for the nuclear industry.

Cobham RAD Solutions – Stand P6

Cobham RAD Solutions offers radiation effects expertise and radiation testing services. We help equipment manufacturers and end users ensure the reliability of systems deployed into ionising radiation environments, reducing risk and cost.

Cogentus – Stand i18

We provide products and services for technical problem solving, optioneering and prioritisation. We help our Clients develop innovative solutions to complex problems and deliver high quality results. Fast. This December marks our 10th anniversary.

Costain Ltd – Stand E2

Costain Nuclear is a multi-discipline engineering design and build contractor providing a full service range from consultancy and concept studies, engineering, design, project management, procurement, construction, commissioning and decommissioning.

Createc – Stand i22

Createc is a technology innovator, combining decades of nuclear industry experience with exploitation of the latest technologies in sensors and computer vision. The result is a range of products for radiation imaging, that can characterise even the most challenging environments.

Crown Commercial Service – Stand J6

CCS is the UK's biggest public help you save time and money when buying business goods and services, so you can focus on what really matters to you.

Cyclife – Stand N12

Cyclife is the specialist delivery organization dedicated to decommissioning and radioactive waste within the EDF Group. The European leader in Nuclear waste treatment & decommissioning, uniquely offering a full range of services including project management, engineering and waste management. Promoting innovation and developing sustainable cost-effective solutions.

Cygnat Fabrications Ltd – Stand P1

Cygnat Fabrications Ltd specialise in the manufacture of polypropylene and polyethylene products for a wide range of engineering, water, waste water and landfill applications

Our portfolio includes Manholes, valve chambers, catch-pits, box manifolds, storage tanks and containment vessels and other thermoplastic pipe systems.

DAE Systems Ltd – Stand J10

DAE originally formed in 1926 as Colston Engineering, have previously supplied numerous components to the Nuclear industry including Flasks & Containers, Flask Transporters, Mechanical Structures and a variety of Machined and Fabricated Components.

Accreditations include F4N, ISO9001, AS9100, ISO14001, OHSAS18001, EN15085, BSEN3834, EN1090.

Dalton Nuclear Institute – Stand M20

The University of Manchester's Dalton Nuclear Institute delivers world-leading fundamental and applied research across the nuclear fuel cycle in close partnership with industry, universities and government agencies. Our Dalton Cumbrian facility offers state-of-the-art-equipment and expertise in radiation science and nuclear engineering decommissioning (robotics).

Darchem Engineering – Stand G18

Darchem Engineering specialise in the design, manufacture and installation of high quality Nuclear stainless steel fabrications. Over 50 years nuclear industry experience.

- Reflective Metallic Insulation
- Passive Fire Protection
- High grade Fabrications
- S/S Pool Liners/ In-Cell Linings
- Waste Containers
- High Integrity Ventilation Ducting
- Impact Energy Absorbers

DBD Ltd – Stand C21

DBD is a UK-Based, independent enterprise providing innovative solutions to complex management, technical and engineering issues, in highly regulated industries. Specialising in five core areas:

- Strategic & Technical Consulting
- Process & Chemical Engineering
- Modelling & Simulation
- Safety, Security & Environment
- Site Commissioning, Operations & Maintenance.

Decision Analysis Services Limited – Stand G2

Experts in the use of systems thinking, programme management, business case modelling and information assurance. Coupled with extensive nuclear regulatory, operations delivery and engineering experience, our expertise provides clear insight and foresight to solve critical client challenges. Our clients include LLWR, MoD, AWE, NUGEN, EDF Energy, and NSAN.

Delkia – Stand H13

Delkia offer focused Power and Automation Engineering solutions for the Infrastructure, Process and Energy Sectors. We offer design, manufacturing and assembly, and provide dedicated field services. Including maintenance, installation and commissioning that complement our established control panel building and system integration capabilities.

Demag Cranes & Components – Stand A7

Demag Cranes & Components is a world market leader in the design and manufacture of Demag crane systems and associated lifting equipment, including proven solutions for the Nuclear and Aerospace Industries. Specialised systems may be tailored to meet the specific requirements needed in the precise handling of such sensitive and high-value loads.

Department for International Trade – Entrance to exhibition hall

The UK's Department for International Trade secures UK and global prosperity by promoting and financing international trade and investment, and championing free trade. We help businesses export and grow into global markets. We also help overseas companies locate and grow in the UK.

Derwent James Ltd – Stand F9

Dopak sampling systems for the safe sampling of hazardous liquids and gases in nuclear environments. Sampling liquids and gases into sealed containers. Safe for operator and environment with zero emissions. Manually operated systems or automated systems for the most challenging of nuclear sampling applications.

Design Services Alliance – Stand N25

The Design Services Alliance (DSA) is a long-term collaborative design framework and is critical in facilitating Sellafield Ltd.'s objectives.

Contracts include AXIOM (AmecFW, Jacobs, Assystem and Mott Macdonald JV) and the Progressive Alliance (Cavendish Nuclear, AECOM, Costain and FNC).

Diversity and Inclusion – Stand S10

Respected. Included. Performing at Our Best. – Equality, diversity and inclusions are not “nice to haves”; they are essentials to maximise your business and staff potential and are the expected minimum standard from those entering the workplace now.

Dodd Nuclear – Stand D3

Specialist in High Integrity fabrication company specialising in Stainless steel, Carbon and Aluminium manufacture. Dodd Nuclear offers customers world class engineering solutions through innovate Design and Manufacture to meet customers specifications. Dodd Nuclear is a Joint Venture partner of Bourne Nuclear part of the Bourne Group of companies.

Dormor Machine & Engineering Co Ltd – Stand D9

A medium sized subcontract machining company specialising in large scale precision engineering projects with a lifting capacity of up to 10 tonnes. We provide high quality precision machining & engineering solutions.

DroneOps Ltd – Stand i21

Drone constructors and electronics' specialists, well versed in the technology and development of bespoke sub 20kg drones. DroneOps is working with BAE Systems, Shell, Akzo Nobel, Bureau Veritas, Barrier Group KTN and Innovate UK to develop small autonomous internal inspection drones. They train pilots to understand skills, aptitude and best practice. www.droneoperations.co.uk

DRS – Stand N4

DRS is a wholly owned subsidiary of the Nuclear Decommissioning Authority (NDA). The company was established in 1995 as a lynch pin supplier of transport and associated services to the nuclear industry.

DSRL – Stand N16

Once the UK's nuclear fast reactor research and development site, Dounreay is one of Europe's most complex closure projects. Today it is a site of construction, demolition and waste management. Its experimental history means that decommissioning the site requires innovation as well as great care.

Eadon Consulting Ltd – Stand K10

Eadon Consulting are experts in the design and analysis of high integrity nuclear handling equipment and specialist structures, including seismic and dynamic analysis. Experience across multiple sectors promotes problem solving and innovation, from concept to through to detailed design.

Eckert & Ziegler Environmental Services Ltd – Stand K4

Eckert & Ziegler's expert team, with a combined experience of 100+ years, delivers safe and cost-effective disposal and recycling of radioactive materials in full regulatory compliance. We provide the complete radioactive management solution for all your needs including packing, consignment and transport using in-house ADR and RPS trained technicians.

eCom Scotland – Stand R4

eCom is focused on the delivery, tracking and reporting of workforce learning and development through innovative technologies. Our products and services address a range of workforce management, development and training challenges, and include eLearning, online assessment, blended learning, competency management and accreditation.

EIC – Stand H4

The Energy Industries Council (EIC) is the leading trade association for companies working in the global energy industries. With offices in key international locations, the EIC's role is to help members maximise commercial opportunities worldwide. Our member companies supply goods and services across the oil and gas, power, nuclear and renewable sectors.

EMCEL Filters – Stand D10

EMCEL provides a complete service to R&D Departments, Project Engineers and Consultants:- from initial design, CAD drawings, prototypes, testing through to final production.

EMCEL supply particulate and carbon filters, including special high temperature versions for the Nuclear Power Generation & Isotope Production industries.

EneffTech UAV Services– Stand i7

EneffTech UAV are a complete solutions provider for remotely piloted aircraft systems (Drones), offering independent consultancy, scenario based flight skills training, NATS CAA approved Ground School Theory Training, equipment and technology supply as well as inspection services by our team of experienced & qualified pilots.

Energy Coast UTC – Stand S1

The Energy Coast UTC is an education establishment for students from 14-18 years old. The NDA is a member organisation of this UTC.

Equipos Nucleares S.A.S.M.E – Stand R1

Ensa was established in 1973 to satisfy the demands of Spanish nuclear program and in 1980 started its internationalization. The company designs and manufactures large nuclear components (reactors, steam generators, pressurizers, heat exchangers, racks and casks). Also provides solutions for dismantling projects performing activities as cutting of primary loop, resins cementation, declassification, decontamination and underwater cutting.

ERIKS – Stand E11

ERIKS provide high-quality mechanical, electrical and maintenance components, backed by extensive technical, repair and logistics services. ERIKS know-how and expertise is focused on Bearings and Lubrication, Power Transmission, Fluid Power, Transfer and Control, Sealing and Polymer, Flow Technology, Tools Maintenance and Safety.

E-Step Ltd – Stand N26

Based in North Wales, E-Step Ltd has led change in Asset Management and Equipment Reliability practices for various organisations around the world.

E-Step Ltd believe people make the difference and offer formal change management knowledge and experience in parallel to technical competence.

Fircroft Engineering Services Limited – Stand H5

Fircroft is a global workforce solutions provider to the technical engineering sectors.

Flamgard Engineering Limited – Stand N11

Flamgard are manufacturers and designers of High Integrity HVAC Fire Dampers, Shut Off Dampers, Total Isolation Dampers, General Dampers, Weather Louvres and Moisture Eliminators for the Global Nuclear Industry. All products are certified and tested to the highest international standards.

Fluidic Limited – Stand H11

Fluidic Limited are a supplier of instrumentation products, and regularly offer 'design assistance' on nuclear projects. We represent 12 manufacturers who have experience of manufacture for to the NDA estate, and six of these are also UK SME's.

Fort Vale Nuclear Ltd – Stand D18

Fort Vale Nuclear Ltd is a supplier of choice for machined and fabricated components to supplied drawings or the development of design concepts, through to general arrangement and engineering drawings followed by subsequent manufacture.

Forth Engineering (Cumbria) Ltd/Visatec – Stand i13

Forth and Visatec for the past 6 years have worked collaboratively providing technical solutions to assist Clients in delivering successful projects in the Nuclear sector. We have a wide range of Cameras, Lights, ROVs, and Deployment Systems all designed specifically with Nuclear in mind.

Franks Portlock Consulting Limited – Stand K12

An Asbestos Consultancy specialising in Asbestos Surveying, Testing, Inspection, Compliance Management and Training.

UKAS accredited for Inspection (ISO 17020) and Testing (ISO 17025).

Experienced Nuclear Professionals with a proven reputation for supporting the nuclear industry throughout all stages of Asset Management, Remediation and Decommissioning.

Frazer-Nash Consultancy – Stand G16

Frazer-Nash is a leading systems and engineering technology company. We've been delivering value and competitive advantage to businesses in the nuclear industry for over 30 years. The skills we've developed and the insights we've discovered have placed us at the forefront of the industry.

Fugro – Stand K11

Fugro is a leading international provider of geo-intelligence and asset integrity solutions with expertise extending from pre-construction site investigation to de-commissioning support. Services include structural and geotechnical surveys, testing, measurement and monitoring.

Furness Engineering and Technology Limited – Stand i25

FETL is a highly motivated, successful engineering consultancy with parallel reputations for providing quality support services to the Nuclear, Oil & Gas, Process and Utility Industries. Since 1979 FETL has grown significantly and been strengthened with a variety of experienced technical and management personnel.

GAP Hire Solutions – Stand M7

GAP Hire Solutions is the UK's leading independent equipment hire company. With 8 divisions and over 130 locations across the UK, we've got everything you need from dumpers and diggers to track mats and portable toilets.

GD Energy Services Limited – Stand N18

GDES is a Decommissioning Support Services Company based in Caithness supporting DSRL but providing support services at other sites including RSRL Winfrith.

Gen2 – Stand S20

Gen2, a member of the City and Guilds Group, is a major provider of engineering and technology training to the nuclear sector in the UK.

Gleeds Energy Limited – Stand F15

Gleeds Energy Ltd: a sector focused business for the provision of end to end consultancy services to the nuclear and energy sectors. Comprising c200 sector specialists for procurement, estimating, contract/commercial/cost management services with reachback to 1700 staff within Gleeds' 20 UK and 68 international offices.

Global Energy Group – Stand F6

Based in Scotland and working worldwide, the Global Energy Group is a highly successful, award-winning energy sector service group.

GNS Gesellschaft für Nuklear-Service mbH – Stand L9

GNS Gesellschaft für Nuklear-Service mbH, world leading supplier of casks for spent fuel, HLW and ILW, also offers comprehensive services for management and disposal of spent fuel and all types of radioactive waste.

Goodwin International Ltd – Stand J11

We specialise in complex, critical component engineering; incorporating all engineering activities from DfM, supply of material, machining, fabrication, assembly, testing and inspection. Our large capacity and unique skillset enables us to provide an unrivalled one-stop "build to print" service.

Gow's Lybster Ltd – Stand N17

Gow's Lybster have been carrying out major engineering contracts within the Nuclear Industry for 30 years and pride ourselves on our commitment to deliver safely, on time and to budget.

GRAHAM Construction – Stand M14

GRAHAM Construction is a multi-discipline civil engineering contractor working throughout the UK on projects in the following sectors: nuclear, rail, highways, water, energy and marine.

Graham Engineering Ltd – Stand C13

As an innovative advanced manufacturing business partner, Graham Engineering Limited (GEL) delivers high integrity manufacturing solutions to a wide variety of market sectors including: Nuclear; Aerospace; and Low Carbon Energy. GEL specialise in producing 'nuclear product' and 'hazardous waste' containers for the Nuclear Industry.

Grŵp Llandrillo Menai – Stand S19

Grŵp Llandrillo Menai, located in North Wales, is a leading FE college with an international outlook. Key to GLLM's work is skills training and support for employers in construction and engineering, with a focus on the needs of the nuclear industry and associated supply chain.

GVA – Stand M9

GVA is one of the UK's leading real estate advisors, with over 40 years of experience dealing within the UK nuclear industry. Services include strategy development, sales and acquisitions of land/property, business rates consultancy, planning, environmental management, property management and assurance services.

Hampco Ltd – Stand H9

Hampco Ltd, established in 1988, specialises in the supply of medium and high integrity lifting and handling solutions. Almost 30 years later, with a wealth of experience gained, we are still solving challenging problems and providing custom solutions, by responding rapidly and cost effectively.

Hargreaves Ductwork Ltd – Stand D5

Hargreaves Ductwork Ltd. is the UK's leading provider of specialist high integrity ventilation and containment solutions.

We offer bespoke systems from concept, initial design and engineering through to fabrication and installation with vast experience delivering the most complex nuclear projects to the highest performance criteria.

Hart Door Systems Limited – Stand A8

Hart Door Systems is a specialist, UK-based, engineering company with over 65 years continuous trading. It designs, manufactures and installs a wide range of door systems to international standards and for a range of applications - energy saving, fire resistance, ATEX compliance and high security.

Heatric (Division of Meggitt UK Ltd) – Stand G9

Heatric, a division of Meggitt, is the world leader in diffusion bonded heat exchangers. Heatric compact heat exchangers are used in the most demanding duties across power generation, LNG production and shipping, marine propulsion, oil & gas production, high performance cooling, and process industries

Hertel – Stand C26

Hertel are a key tier 2 supplier to the NDA estate, currently working on Sellafield and 6 Magnox sites. We provide multi-discipline on-site services in support of asset care and enhancement, decommissioning and deplanting projects.

Hilti (Gt. Britain) Ltd – Stand i20

At Hilti we design and manufacture leading-edge technology, software and services, which power the professional construction industry.

We're global, based in over 120 countries with more than 23,000 employees.

HKA – Stand C2

HKA is one of the world's leading providers of expert advisory and consulting services for the development of major projects, programmes and assets around the world, working to achieve clarity and certainty for clients in delivering their outcomes.

Hosokawa Micron Ltd – Stand M5

Hosokawa Micron provides a wide range of solutions for the processing and containment of hazardous materials Chemical, Pharmaceutical, Food & Nuclear industries including:

- Gloveboxes, down-flow booths, fume cupboards
- Size reduction - pre-breaking, fine milling, micronising
- Nano-particles & particle engineering
- Mixers, Blenders, Dryers
- Compaction & pelletising
- Drum filling systems

i3D robotics limited – Stand i27

Focused on 3D vision for industrial application using our core vision & sensor network products. These include high-resolution stereo producing 3D reconstruction of scenes for use in intelligent industrial solutions benefiting from software tools for object recognition. Sensor networks fuse data integrating multiple instruments.

IDOM Merebrook Ltd – Stand J4

IDOM is an independent partnership offering a broad spectrum of engineering design and analysis services to the nuclear sector. We cover everything from new build to decommissioning and from fission to fusion and R&D work.

IHS Markit – Stand L8

IHS Markit has a 45-year history as the world's largest and most trusted provider of engineering standards. Our new Engineering Workbench platform provides access to 130 million authoritative technical documents, standards, patents and guidance material, searchable alongside companies own internal knowledge and information.

IKM Consulting Ltd – Stand R3

IKM have a 20-year legacy of innovation in Scotland and the UK. Our services include Civil & Structural Engineering, Environmental & Geotechnical Engineering, Building Services, Surveying, 3D Scanning/Modelling/Visualisation and Training.

IMechE Engineering Training Solutions – Stand S2

IMechE Engineering Training Solutions (incl. Argyll-Ruane) is a world leading provider of NDT and Coatings training, certification and Level 3 Consultancy services. All major methods are available onsite, remote and online to international certification standards such BS-EN-ISO-9712, EN4179, NAS410, SNT-TC-1A and ICorr (Institute of Corrosion).

Imenco UK Ltd – Stand i35

Imenco UK Ltd provides mechanical, electronic, CP, and bespoke engineering products to the world's leading oil, gas, drilling, offshore wind energy and subsea companies. Imenco is transferring these tried and tested, safe, easy to use and quick to install product solutions into the nuclear sector.

ImiTec Limited – Stand i3

ImiTec specialises in the development and manufacture of novel methods for mapping radiation. ImiTec's core capability is the Remote Isotopic Analysis System which detects, characterises and maps radiation in real-time; it can be integrated onto different platforms including UAV's, vehicles, robotic and pipeline inspection systems.

Indelible Data Limited – Stand J5

Indelible Data Limited is a Cyber Security consultancy that offers cyber training to "up-skill" IT departments, awareness training for staff and Certification to HMG's Cyber Essentials Scheme.

Independent Forgings and Alloys Ltd – Stand A5

IFA is a premium supplier of high integrity forged products to quality markets around the world. From raw material ingot to near net shape semi-finished components. Serving critical service environments in the Aerospace, Nuclear, Oil & Gas, Marine and Power Generation sectors.

Induchem Group – Stand C14

Induchem Group is an experienced process equipment service provider. We specialise in automation and control with 24/7 engineering and technical service. We exclusively represent Xomox Easi Sleeve modular plug valve specifically designed for BNFL.

Infrastructure Strategic Alliance (Sellafield Ltd working with Morgan Sindall and Arup) – Stand G8

The Infrastructure Strategic Alliance (Sellafield Ltd working with Morgan Sindall and Arup) provides vital upgrades to the infrastructure assets at the Sellafield site.

Inglenorth Contracting Ltd – Stand B3

Inglenorth Contracting Ltd are an experienced decommissioning contractor. We are part of the 10-year Lot 1 DDP at Sellafield with over 20 projects completed to date. Other works have been undertaken on Capenhurst and Springfields.

Innovate UK – Stand i8

Innovate UK drives productivity and growth by supporting businesses to realise the potential of new technologies, develop ideas and make them a commercial success.

Telephone: 01793 361000

Email: support@innovateuk.gov.uk

www.innovateuk.gov.uk

Innovative Physics – Stand i17

Innovative Physics design and develop novel radiological detection equipment for the Civil and Defence Nuclear markets. We provide technologies, products and consultancy.

Inspectahire Inst. Co. Ltd – Stand i38

Inspectahire are hosting the output of the MAPS project – a pipe inspection technology developed in conjunction with Sellafield, NNL, Uni of Strathclyde and Wideblue, funded by Innovate UK. This forms part of our portfolio of Remote Visual Inspection Technology.

International Nuclear Services – Stand A2

International Nuclear Services Limited (INS) is a wholly-owned subsidiary of the Nuclear Decommissioning Authority (NDA). We have extensive and proven expertise in irradiated fuel management and transporting nuclear materials.

Interserve – Stand D14

Interserve are a leading support services and construction company, operating in the public and private sectors. UK based, £3.7 billion gross revenue and 84,000 people worldwide, we offer building, equipment and outsourcing solutions including facilities management and front line services.

Jacobs – Stand M21

Jacobs has been providing a diverse range of services to the NDA estate for over 30 years. We currently have more than 650 staff working across our portfolio of projects.

James Fisher Nuclear Ltd – Stand M24

James Fisher Nuclear delivers specialist engineering, design, manufacturing and technical service for applications within challenging environments. JFN delivers safely, on time and within budget projects ranging from bespoke designs to complete turn-key solutions. The JFN stand will feature UAVs used for inspections on nuclear sites.

James Walker – Stand D4

With a long history of providing safe, reliable, innovative options for maintenance, new build and decommissioning applications, James Walker is showcasing seal and component design and manufacturing capabilities in class-leading radiation-resistant, PMUC approved elastomer materials plus the company's innovative and proven RotaBolt tension measurement bolting.

JCS Ltd – Stand P3

John Caunt Scientific Ltd. (JCS) has been supplying nuclear radiation sensing and shielding solutions since 1975, with a long-standing history for supplying solutions across the UK nuclear landscape and beyond, and a strong reputation for providing high quality, innovative products and services.

JGC Engineering and Technical Services Ltd – Stand N19

JGC Engineering and Technical Services Ltd are committed to providing our customers with access to a Mechanical, Electrical, Controls and Instrumentation design, build, test and commissioning organisation “under one roof” that is capable of providing the right people with the right skills who are dedicated to producing the project to time and cost.

Jordan Manufacturing Limited – Stand F4

Manufacturing and fabrication of bespoke equipment in carbon steel, stainless steel and complex alloys. Operating from facilities near Bristol, we provide a wide range of design, manufacturing, assembly, testing and site services to highly regulated industries. Our workshops totalling 5,200 Mt2 are dedicated to the manufacture of high integrity, high quality products, equipment and assemblies.

K Home International – Stand M1

K Home International provides high quality multi-discipline engineering design, project management and construction management services to highly regulated industries in the UK and overseas.

KAEFER – Stand C22

KAEFER operates worldwide; has a £1.5 billion turnover and employs 28,000 personnel. We operate in several industry sectors including the nuclear sector.

KAEFER carries out engineering (integrated) services including HVAC, Insulation (hot and cold), scaffold access, asbestos removal, NDT and Acoustic Insulation.

KCP – Stand E4

KCP's engineering skill, lateral thinking and precision working, with an innovative tool kit, provides solutions to difficult challenges in material transfer, including gravel, grain, silt, sludge, waste, debris, liquids and dry powders, environmental maintenance plans, manufacturing, asset management, production process problems and anaerobic digester maintenance.

KDC Contractors Limited – Stand P7

KDC's principal areas of business activity is the safe decommissioning, dismantling, demolition; asset appraisal, sale of plant and equipment; hazardous substance management (e.g. asbestos and radiological); waste management and land remediation.

Klauke UK Ltd – Stand i28

Klauke manufacture portable lightweight cable cutting equipment which can be used on Steel, Copper and Aluminium. New innovations allow remote operation of the equipment for confined or contaminated areas.

Kloeckner Metals UK – Stand M10

Kloeckner Metals UK is committed to supporting the delivery of all new nuclear power stations in the UK, whilst continuing to support all existing operational nuclear sites and the NDA's decommissioning programme.

KUKA Systems UK Ltd – Stand F1

KUKA Systems UK Ltd provide robotic Systems to the nuclear decommissioning market.

L2 Business Consulting Limited – Stand D16

L2 Business Consulting Limited (www.l2businessconsulting.com) are a UK independent technical consultancy established in 2009 providing advice to the nuclear, oil/gas and other high hazard industries across environmental permitting, radiological protection, radioactive waste, nuclear site licensing, environmental protection and health & safety.

Laker Vent Engineering Limited – Stand K13

Our supply, fabrication and installation services for High Integrity process industries, provides our customers with the confidence of quality assured services.

Lakes College – Stand S18

Lakes College provides Further and Higher Education from its base in West Cumbria, supporting the nuclear industry with technical and vocational skills training and apprenticeships, including business support and leadership. Lakes is a founder member of the National College for Nuclear, running the Northern Hub.

LCA Controls – Stand A9

LCA Controls are the experts in the design, manufacture and installation of electrical, control & instrumentation systems. Our services are provided to supply a fully tailored solution whether it's for, project management, design, manufacture, installation, inspection & testing or commissioning.

Limpet Technology – Stand i9

Limpet® systems are award winning height safety systems that are used around the world for accessing wind turbines, met masts, telecoms towers and silos. By enabling safer and faster access to tall structures, Limpet® systems significantly lower the cost of operations and maintenance work.

Lionweld Kennedy Flooring Ltd – Stand M17

With over 100 years' experience, Lionweld Kennedy Flooring Ltd is a global supplier of gratings, handrail systems, platforms, stair treads and ladders, all available in steel or GRP/FRP.

Lloyd's Register – Stand K7

Lloyd's Register (LR) is a global engineering, technical and business services organisation wholly owned by the Lloyd's Register Foundation, a UK charity dedicated to research and education in science and engineering.

Lokring Northern – Stand i1

Lokring provides a weld equivalent pipework connection that meets the ASME piping specification. The Lokring install eliminates hotwork and removes the need for NDT inspection. Utilised by most UK nuclear facilities and other Worldwide Nuclear sites.

Low Level Waste Repository – Stand N8

LLW Repository Ltd is a waste management company that provides services to customers to treat and dispose of low level radioactive waste.

It manages the national Low Level Waste Repository in West Cumbria on behalf of the Nuclear Decommissioning Authority (NDA) and oversees a National LLW Programme to ensure that lower activity waste is managed effectively across the UK.

Lynkeos Technology Ltd – Stand H3

Lynkeos Technology is the worldwide first company to specialise in cosmic-ray muon tomography for nuclear waste drums and other heavily-shielded containers. Lynkeos is currently funded by Innovate UK to set-up a first-of-a-kind demonstrator facility on the NNL Preston site in early 2018.

M+W Group – Stand M11

M+W Group has been involved in the nuclear industry for over 40 years. Today, we operate across the civil nuclear market, delivering solutions for facility new-build, decommissioning, research and development as well as asset life extension. Uniquely, we also offer a complete-spectrum service through design, fabrication and installation of the nuclear industry's leading HVAC and containment systems worldwide.

M5tec Ltd – Stand D17

M5tec Ltd are a provider of Multidiscipline Engineering Technical Services to high assurance industries worldwide such as, Marine Mining, Subsea & Offshore, Nuclear and Oil & Gas as well as General Engineering. Please feel free to take a look at our website & services www.m5tec.com

Magnox – Stand N22

Magnox, owned by Cavendish Fluor Partnership, is the management and operations contractor responsible for twelve nuclear sites and one hydroelectric plant in the UK. Our work is as diverse as it is challenging, ranging from electricity generation through to defuelling sites at the end of generation and the introduction of innovative techniques to accelerate decommissioning and clean-up. We have outlined a number of strategic goals which will mark our progress along the route to safely delivering our sites into care and maintenance.

Mammoet UK – Stand G3

Mammoet helps clients improve construction efficiency and optimize the uptime of plants and installations. For that purpose, we provide solutions for lifting, transporting, installing and decommissioning large and heavy structures.

Marick – Stand C3

Marick is a creative agency specialising in events, video, design and communications. We are the organisers of today's event and have significant experience, more than 25 years, of working in and with the nuclear sector. www.marickpartners.co.uk

Marine & Industrial Plastics Ltd – Stand B13

Marine and Industrial Plastics is an established (1957) privately owned business specialising in remote handling and glass reinforced plastic (GRP) solutions and mouldings. Our primary manufacturing items are bespoke and industry standard glove ports and modular containment systems supplied to the nuclear and pharmaceutical industries.

Market Cross UK Limited – Stand N27

Market Cross UK Limited is a nuclear safety services company consisting of qualified and experienced nuclear consultants, safety consultants, project managers, operators and engineers. Our unique business model is the driving force behind our success and our ability to provide high innovation at low cost.

Matom – Stand D8

Matom provides innovative solutions for nuclear decontamination, utility and industrial cleaning applications across the UK and around the globe. We bring the depth of experience to plan and manage every aspect of a project. Our expertise translates into accelerated programmes, radioactive secondary waste reduction and metals management to reduce waste categories.

MC Air Filtration Limited – Stand B14

MCAF have supplied a range of HEPA filters and housings to UK nuclear sites in the UK for over 30 years. The company are at the forefront of HEPA filter design, manufacture and supply and are the current holders of the NDA filter framework agreement.

McCarthy Environmental Ltd – Stand E17

McCarthy Environmental specialise in extraction, filtration and Local Exhaust Ventilation systems to control harmful substances and fumes arising from engineering and manufacturing operations. Our bespoke manufacturing capability provides for complete, cost effective turnkey solutions from consultation and design, through to installation, commissioning and operator training.

McEvoy Engineering – Stand L12

High integrity fabrication and integrated engineering in carbon steel, stainless steel and aluminium, with more than 25 years of nuclear sector experience.

Ability to comply with QHSE and SQEP expectations. CE Marking To EXC 3.

Contact: Alison McEvoy – Business Development Manager

alison@mcevoyengineering.co.uk

www.mcevoyengineering.co.uk

MechaTech Systems Ltd – Stand F12

SME specialists in design, manufacture and service of Freeze Dryers, S35 Gas Sampling Systems, and High Vacuum Systems, including award-winning Advanced Vacuum Drying System (AVDS), a proven solution for conditioning nuclear waste for long-term storage in its original, disposable container.

Mirion Technologies – Stand i41

Manufacturer of radiation safety, visual inspection, and measurement equipment. Product lines include Non-Destructive Assay systems for waste characterisation, expert radiation measurement and services solutions, CCTV and imaging systems, and personal dosimetry products and services. Also offers site-wide maintenance and off-site repairs.

MITIE – Stand L3

MITIE work on the NDA estate as 'ONEFM', supplying Facilities Management Services to the NDA estate on the 'Cumbrian Collaboration' contract, Sellafield, Direct Rail Services, International Nuclear Shipping and Low Level Waste Repository. Within this framework they supply hard and soft services across the estate.

MMI Engineering Ltd – Stand N5

MMI Engineering provides technical consulting services, specialising in the management of man-made and natural hazards utilising highly qualified professionals with experience in design, construction, operations and project management. We provide design expertise, engineering analysis, safety report authoring and independent review to clients at all stages of project lifecycle.

MOD – Stand E6

The Submarine Delivery Agency has been established (April 2017) to focus solely on the procurement and in-service support of the UK's nuclear submarines. It will become an Executive Agency of the MOD, alongside DE&S, under a phased approach.

Mon Maintenance Services Ltd – Stand E7

A pragmatic company specialising in M&E services. We provide a Quality Comprehensive "one stop shop" complimentary installation and maintenance Service. Safety, Quality and the Environment are firmly embedded into the fabric of how we work.

Mona Lifting Ltd – Stand G5

Mona Lifting Ltd have manufactured innovative lifting and engineering products for the power and manufacturing industries since 2004. Specialising in the design, manufacture and installation of overhead cranes and providing bespoke lifting and engineering solutions. Site personnel hold full security clearances and are Radiologically Classified Workers.

Morgan Sindall – Stand E5

Morgan Sindall is a UK construction and infrastructure business with a network of local offices. The company works for private and public sector customers on projects and frameworks from £50,000 to over £1 billion and operates across the commercial, defence, education, energy, healthcare, industrial, leisure, retail, transport and water markets.

Morson Projects – Stand B8

Morson provide a unique blend of recruitment and design consultancy services. We provide engineering and design solutions to major capital projects using the latest technology and systems. Our cyber security division supply market leading technology to help protect businesses against internal and external cyber threats.

Mott MacDonald Limited – Stand F13

Mott MacDonald is an engineering, management and development consultancy which provides the nuclear sector with a range of services to support both the civil and defence sectors.

Murphy Surveys Ltd – Stand C9

Murphy Surveys is the leading land and engineering surveying company in the British Isles. Established 30 years ago in Ireland, we have now over 200 employees in Ireland and the UK.

National College for Nuclear – Stand S16 & S17

The National College for Nuclear is an employer academia partnership that will deliver education and training to address current and future skills needs for the sector. By developing regulated qualifications and awards we aim to focus education directly to the needs of employers and learners.

National Nuclear Laboratory – Stand i39

The UK's National Nuclear Laboratory (NNL) offers a breadth of technical products and services covering the complete nuclear fuel cycle, from fuel manufacture and power generation to reprocessing, waste treatment and disposal. NNL has key role advising the UK Government on strategic nuclear matters.

National Skills Academy for Nuclear – Stand S11

NSAN works with companies and training providers from across the nuclear industry – both civil and defence, to provide support and solutions to the skills issues experienced by those committed to the successful delivery of the planned (UK) nuclear programme.

www.nsan.co.uk

NCPI Solutions – Stand B10

ModiCam is a rapidly deployable battery-backed gateway device that provides internet connectivity for the High-Resolution Mobotix CCTV camera systems. An embedded application gives secure VPN remote access to camera images, camera controls, recent camera events and battery state of charge.

NDA – Stand A1

The NDA aims to deliver safe, sustainable solutions to the challenge of nuclear decommissioning and clean-up. This means:

- Never compromising on safety or security
- Taking full account of our social and environmental responsibilities
- Always seeking value for money for the taxpayer
- Actively engaging with stakeholders

NDA R&D – Stand i8

Research and development (R&D) is vital to finding solutions for some of the complex challenges faced by our sites. The majority of this R&D is undertaken by our SLCs and their supply chain but we maintain an R&D programme to inform our estate-wide strategy, deliver innovation across multiple sites and maintain and develop essential technical skills.

NES Global Talent – Stand N24

NES Global Talent has been providing technical, multi-disciplined engineering personnel to a wide array of companies throughout the UK and overseas since 1978, offering a full suite of solutions to cater for our client's needs.

NIS Limited – Stand A3

We are an engineering organisation who are proud to provide bespoke, pragmatic, design and manufacturing services to a range of clients working across quality driven sectors. Our aim is to delight our clients with the service we provide, whilst enjoying our work delivering engineering excellence.

North West Nuclear Forum – Stand H1

The leading network for business development opportunities in the nuclear industry supply chain. The Forum is a group of like-minded companies, both large and small, who see mutual benefit in sharing their collective business knowledge.

www.nuclearforum.org

North West Projects Ltd – Stand L10

North West Projects provides comprehensive Project Management, Mechanical, CE&I and HVAC engineering design across the full design lifecycle including support through implementation by applying innovation which provides high quality collaborative engineering design service with a commitment to safety, cost and integrity.

Northern Power UPS – Stand F10

Based in Greater Manchester, Northern Power UPS has protected critical and essential equipment for over thirty years. We offer backup power solutions to all markets as an independent supplier of high end UPS units, complete with servicing and maintenance contracts tailored to your needs.

NSSG – Stand S8

NSSG is the lead strategic skills forum representing the UK industry's skills demands. Its purpose is to secure the required supply of suitably qualified and competent personnel for the needs of the UK's nuclear sector by providing the strategic direction on skills infrastructure, processes and provision.

NPL – Stand i34

NPL is the UK's National Measurement Institute, and a world-leading centre of excellence in developing and applying highly accurate standards, science and technology. The science and engineering undertaken creates impact for commercial research and development, and supports businesses across the UK and the globe.

NSG Environmental Ltd – Stand i29

Utilising our extensive site experience and technical expertise, we provide pragmatic decommissioning and waste management solutions to the nuclear industry. From desktop studies and modular plant to on-site decommissioning and land remediation, we offer a unique range of capabilities that encompass the entire project lifecycle.

Nuclear AMRC – Stand M12

The Nuclear Advanced Manufacturing Research Centre helps UK manufacturers win work in the nuclear sector. It works with companies of all sizes to develop new technical capabilities, raise quality and reduce risk. The Nuclear AMRC is backed by industry leaders and government, and managed by the University of Sheffield. It is part of the High Value Manufacturing Catapult.

Nuclear Engineering International

Since 1956 Nuclear Engineering International has provided technical insight for the global civil nuclear power industry. Commentating on everything from uranium mining to Radwaste, plant new-build to decommissioning, as well as independently compiling and publishing global nuclear plant performance statistic, we've got the sector covered.

Nuclear Industry Association – Stand E9

The NIA is the trade association for the civil nuclear industry in the UK. The NIA represents more than 260 companies across the supply chain. The diversity of NIA membership enables effective and constructive industry-wide interaction.

Nuclear Institute – Stand S12

The Nuclear Institute (NI) is the professional membership body for the nuclear industry. We organise educational activities, events and conferences, offer individual and corporate membership and produce a respected industry journal. The NI comprises 10 local branches, the YGN and Women in Nuclear national networks.

Nuclear South West – Stand S4

Nuclear South West is the nuclear cluster for the South West of England. NSW enables businesses to network, develop supply chains and maximise opportunities. We showcase capability in the South West and create the conditions for growth now and in the future.

nucleargraduates – Stand S9

nucleargraduates is an exciting gateway to one of the most stable and secure industries in the UK today and we aim to address the current skills gaps with highly qualified, determined and enthusiastic engineers and scientists. nucleargraduates are the leaders of the future.

Nucleus – Stand K2

Nucleus provide specialist nuclear services across laboratory and desk-based research, waste management and decommissioning, and safety case management, bringing together a unique collaboration of key suppliers and SMEs with an extensive breadth and depth of expert knowledge.

NUKEM Technologies Engineering Services GmbH – Stand B9

NUKEM Technologies Engineering Services in Alzenau, Germany, is world-wide active in the areas of radioactive waste management, handling of spent fuel, decommissioning of nuclear facilities, nuclear engineering and consulting with more than 50 years of experience. Since 2009, NUKEM Technologies is part of the ROSATOM-Group.

Nuvia Limited – Stand i34

Nuvia is an international engineering, project management and services contractor bringing nuclear expertise to nuclear, defence, science and research, and oil and gas sectors. Our operations include; turn-key design and build, consultancy, option studies, safety case, waste management, land remediation, decommissioning and radiation protection.

NW Total Engineered Solutions Ltd – Stand E10

Manufacturing and engineering company specialising in pumps, valves, process equipment packages, fabrication works and M&E installations. We have in-house NDT inspection services, and coded welders for steels and exotic alloys which allow us to manufacture up to Quality Grade 02 for the Nuclear Industry.

OCTO – Stand N6

OCTO has an international reputation promoting effective leadership and management under pressure across all levels of government and private sector.

With extensive experience in the nuclear arena, OCTO offers crisis, incident and risk management tools, training & exercising; emergency facility guidance; personal coaching & accreditation.

Omega Engineering Services Ltd – Stand A4

Omega Engineering Services Ltd (OES) design, build, repair and refurbish test equipment, electrical power systems, cable harnesses, control panels and associated equipment.

OES offer quick turnaround repairs and other technical services.

OES have supplied customers in the nuclear, oil and gas, aerospace and defence markets.

Omniflex UK Ltd – Stand B17

Omniflex remote monitoring specialists supply the UK Nuclear Industry's NDA 2016 Innovation award winning Radiological Surveillance Systems, "Emphasis Assessed" (SIL1) Alarm Annunciators, Trip Amps, signal conditioning products, Radiation Door Warning Signs, Slave Alarm Units, Sequence Of Event and any other remote monitoring applications.

ONET Technologies – Stand i37

Backed by a workforce of over 2700 employees, ONET Technologies offers integrated services that span the entire lifecycle of nuclear and industrial facilities: EPC engineering for new build projects and customised equipment, specialised maintenance services, operational support to nuclear facility owners, decommissioning/dismantling and clean-up, and waste management.

OREKA Solutions – Stand i10

OREKA Solutions is the worldwide leader in collaborative approach for intervention in nuclear field through digital simulation tool based on real-time 3D technologies especially for decommissioning with our software module DEMplus.

Osbit Ltd – Stand K5

Osbit Ltd are an Innovative Engineering SME who have an excellent track record in many sectors and are looking to drive value into the Nuclear Supply Chain where it is badly needed.

Outokumpu Ltd – Stand F5

Outokumpu Stainless offer cold rolled and hot rolled plate, sheet and long products. Capabilities include plasma, laser and water jet cutting. Duplex, super austenitic and heat resistant stainless steels are one of the company's areas of expertise.

P & S Automation Ltd – Stand C10

P & S Automation Ltd provide solutions to your automation and control system problems, we design and build bespoke systems & our team of service engineers make site visits to repair, calibrate, install and commission our and 3rd party systems.

PacTec EPS Ltd – Stand C15

PacTec EPS engineer, design & manufacture certified IP1/IP2 packaging for safe containment solutions transportation, storage & disposal of VLLW, LLW and exempt wastes.

www.pacteeps.co.uk

01946695005

Pajarito Scientific Corporation – Stand i6

PSC offers a comprehensive range of standard and customised systems to satisfy every kind of nuclear material location, identification, characterisation, containment, ventilation and shielding challenge. We offer plant-integrated systems, contract measurement services and on-site and remote NDA specialist consultancy including MCNP modelling.

PaR Systems Ltd – Stand i33

PaR Systems are a World leader in innovative remote handling technology covering Nuclear Cranes, Manipulators, MSM's, Robotics and bespoke equipment such as our TensileTruss™ supporting extreme decommissioning challenges at Chernobyl and Fukushima, technology that we can use to help support the UK Nuclear industry.

Parker Hannifin – Stand A11

Parker Hannifin Corporation is a Fortune 250 company providing critical flow and ultra high purity components for powergen, petrochemical, chemical processing, oil gas, water analysis, biopharmaceutical, semiconductor, & analytical equipment industries.

PDL Solutions (Europe) Ltd – Stand N21

PDL are specialists in applying cutting edge engineering techniques including design, optioneering, FEA and CFD to civil nuclear and naval nuclear problems. From WAGR through to BEPPS DIF, PDL have provided qualified and experienced personnel to tackle the most complex problems in a timely and cost-effective manner.

Penny Nuclear – Stand B2

Penny Nuclear, part of the Penny Hydraulics Group, designs and manufactures mechanical handling solutions for all stages of the nuclear lifecycle. Whether it's for decommissioning, operational, research or new-build sites, we have the knowledge and experience to provide robust, cost-effective solutions within extremely competitive lead-times.

Perfect Bore Manufacturing Ltd – Stand C8

Perfect Bore provides singular and turn-key solutions to both internal and external surface machining operations through its gundrilling, deep-hole boring, honing, CNC turning, CNC Grinding and superfinishing capabilities.

Perma-Fix Environmental Services UK Ltd – Stand H12

Perma-Fix Environmental Services is a global provider of nuclear waste management services to all sectors of industry. Perma-Fix specialise in the management and treatment of radioactive wastes using its range of facilities and patented technologies.

Peterson (United Kingdom) Ltd – Stand D15

Peterson (United Kingdom) Ltd offers a comprehensive range of safe, reliable and value-added logistics solutions to the global energy industry from strategic locations.

Portakabin – Stand L7

Portakabin pioneers modular construction in Europe, delivering interim and permanent bespoke buildings, of any size and to fulfil almost any application, site and design. It has provided award-winning off-site built environments of outstanding quality, with unrivalled on time and on budget performance, for over 50 years.

Portobello - RMF Engineering Ltd – Stand B7

Experienced specialists in design and manufacture of welded metallic structures such as heat exchangers, reactors, pressure vessels, and pipework. High-integrity fabrications built to internationally recognised standards.

Pöyry Energy Limited – Stand C6

Pöyry is one of Europe's leading nuclear engineering consultants. Pöyry provides:

- Safety case production/review;
- PSA and HAZAN assessments;
- Strategic/options studies;
- Licensing Advice;
- Collection, assessment, verification of radioactive inventory data;
- Consultancy on waste composition/packaging/transport;
- Design and independent review of HVAC Systems;

Premier Hytemp – Stand M6

Premier Hytemp are a F4N approved turn key manufacturer of precision machined parts, an SME with manufacturing experience in Nuclear in line with Sellafield contract quality requirements SLM 4.06.02. with a proven track record in materials and supply chain management

Presentation Technology Ltd – Stand M2

We create, manufacture and supply specialized safety signage software and materials.

Prima Uno Ltd – Stand L5

Prima Uno are a multi sector consultancy specialising in:

- Project controls
- Programme and project management
- Programme Management Office
- Dispute resolution
- Project controls training

Offering a full range of services from cradle to grave across the entire property and infrastructure lifecycle.

Prospect Law Ltd – Stand F8

Prospect Law is a Multi-Disciplinary Practice with specialist expertise in the infrastructure sector, including extensive experience of advising the nuclear industry at an international level. The firm is made up of lawyers, engineers, finance and technical experts who between them provide a complete and integrated service for clients purchasing professional services.

PSL Assemblies Ltd – Stand C17

PSL Assemblies Ltd are manufacturers of Semiconductor Stack Assemblies, Power Conversion Sub-Assemblies and Thermal Solutions for power electronic applications. Expertise includes custom Heat Sinks, Cooling Plates, Inverters, Rectifiers, Static-Transfer Switches, IGBT & Diode Stacks, Thyristor Assemblies, Isolation cells, and laminated bus-bars.

Pycko Scientific Ltd – Stand F7

Pycko Scientific are agents for manufacturers of specialist radiological monitoring equipment. Including the following:- Model 79 Lightweight Telescopic Probe and Model 30 Small Digital ratemeter. RT30 and the GT40 Hand Held Spectrometer with built in GPS, Tritium Monitors and Alpha Beta Counting Equipment.

Quadrant Security Group Ltd – Stand M4

QSG is a specialist provider of turnkey electronic security systems for complex, critical or regulated environments. QSG has a long association providing security works and support to the nuclear industry which includes the Magnox estate and Urenco.

Raddec International Ltd – Stand E1

Raddec (est 2003) produce innovative analytical instrumentation and software to support waste characterization. We produce systems (bench-top and contained) for volatile radionuclide extraction using either flow-through, thermal oxidation or pressurized oxygen. A recent addition is our new ASRS automatic radionuclide separation system for solutions.

Radwise Ltd – Stand K6

Radwise Limited is a UK based Radiation Protection Services company providing support to the UK nuclear industry since 2001. We are a Tier 2 Framework supplier to the NDA and EDF Energy, supplying a range of services to support their decommissioning, operational, and outage programmes.

REACT Engineering – Stand M23

REACT Engineering is engineering consultancy with a track record of developing innovative and robust engineering and management solutions to address the nuclear decommissioning, waste management and asset care challenges faced by the UK nuclear industry.

Realm Communications – Stand i16

We are a specialist 3D visualisation business and produce high end animations and CGI walkthroughs as well as VR (virtual reality) content for a range of clients including a long standing relationship with NDA/RWM.

Reays Coaches Ltd V C24

Reays - specialists in corporate travel within the nuclear industry.
From chauffeur-driven limousines to executive coaches and VIP mini-coaches.
Operating all over the UK from our base in Cumbria, just off the M6.
www.reays.co.uk

REEL S.A.S. – Stand F3

REEL is an independent company specialized in complex handling systems for applications in critical environments.
REEL is SELLAFIELD's supplier for in-cell cranes within the Category Management programme.

REI Nuclear Europe Ltd – Stand L4

REI Nuclear Europe combines the plant decommissioning experience of REI Nuclear (USA), gained through on-site projects, with the strategy and planning experience of its European team.

We offer:

- Strategy development;
- Decommissioning planning and cost estimating;
- Specialized equipment for complex reactor segmentation tasks.

Responsive Engineering Ltd – Stand G7

From our 33,000 sq. metre facility our capabilities include, Fabrication to EN 15085 & ISO 3834 accreditation.
Clean Room facilities for non- ferrous welding.
3, 4, & 5 axis Machining up to 9mtrs. Waterjet, Laser & High Definition Plasma cutting. Pressing up to 600 tonne.
Shot blasting & Painting.

Restore Scan Ltd – Stand G17

Restore Scan Ltd, a division of Restore PLC, manages Nucleus: The Nuclear and Caithness Archives, on behalf of the NDA. Restore is responsible for delivering operational excellence, regulatory compliance and secure management of archival records across the Nuclear estate, including accessioning, retrieval and digital conversion of documents.

ROBATEL Industries – Stand E16

ROBATEL Industries, in the nuclear industry for over 60 years. We are specialized in transportation and storage casks, Type IP2, A & B, lines of Hot cells, interlocks, gloveboxes, Special equipment with radiation or thermal shielding, radioactive waste treatments, custom boilermaker equipment...

Rovtech Solutions Ltd – Stand J8

Rovtech Solutions, remote engineering solutions for harsh environments. Designers and manufacturers of ROVs, Inspection Cameras, LED Lighting, Manipulators and many bespoke items. Rovtech capabilities include electromechanical design, fabrication and machining, electronics and testing. Over 90% of the products supplied by Rovtech are manufactured in house.

Royston Lead Limited – Stand M18

Royston Lead provides radiation shielding to the nuclear industry. As part of 2IM, we have access to a UK secondary lead smelter allowing us to source, manufacture and supply components in various grades and alloys within an accredited ISO regime.

RSM UK – Stand E14

RSM is one of the world's largest networks of audit, tax and advisory firms providing services to ambitious and growing organisations. Our consulting team help clients to deliver change; improve their operational performance; improve decision-making and manage risk.

R-Tech Materials – Stand K3

R-Tech Materials is a materials testing and consultancy business. Our UKAS accredited testing facility specialises in steel products for the construction of concrete nuclear structures (reinforcing steel, prestressing steel, strand, couplers, anchors etc). In consultancy we specialise in high temperature plant integrity issues in austenitic stainless steels.

RWM – Stand B12

Radioactive Waste Management (RWM) is a subsidiary of the Nuclear Decommissioning Authority (NDA). RWM is responsible for planning and delivering geological disposal of radioactive waste in the UK. Our vision is to create a safer future by managing radioactive waste effectively, to protect people and the environment.

S&H Systems Design and Installation Ltd – Stand D6

S&H Systems have been supplying the nuclear industry for 30 years in the design, manufacture and installation of quality electrical, pneumatic & instrumentation control panels and systems. ISO9001, 14001 accredited with 18001 & F4N (near future).

Satellite Applications Catapult – Stand i24

The Satellite Applications Catapult is an independent innovation and technology company, created to foster growth across the economy through the exploitation of space. We help organisations make use of and benefit from satellite technologies.

SC Innovation – Stand N9

SC Innovation is an innovative engineering and design company providing global, cross-sector products and services. Proud of our agility and speed, we can provide and fully support high performance solutions in exceedingly short timescales. Our work across multiple sectors demonstrates the regard in which our engineering capabilities are held.

Sella Controls – Stand G10

SELLA CONTROLS is a specialist independent designer and supplier, delivering safety critical solutions, system integration and safety lifecycle services.

Sellafield Ltd – Stand B19 and i17

Decommissioning Capability Development Team within Remediation. Looking at bringing Innovation into Sellafield to meet the challenges of broad front Decommissioning.

Serimax – Stand N14

Serimax Nuclear is a full-service manual and automatic welding company. We offer fully integrated welding, fabrication and full project management solutions to the nuclear industry.

Shepley Engineers – Stand M26

Based in Cumbria we are a multidiscipline contractor/ project manager specialising in Mechanical and Electrical engineering in the nuclear sector. We provide a full manufacture, installation and asset care services to the highest quality. We also have decade of experience in Decontamination and Decommissioning within this challenging sector.

SJM Technical Media Ltd – Stand K9

SJM have worked both nationally and internationally for over 30 years, visualising advances in science, engineering and medicine.

Working on location and in studio, SJM intelligently combine photographic, video, 3D imaging and animation techniques to visualize complex projects and demonstrate specific product features.

Smartlift Bulk Packaging Ltd – Stand N10

Here at Smartlift we work closely with clients to identify and meet their individual needs. We are ISO 9001:2015 registered. Our product range includes, Pallet Covers, Stretch Wrap with our core product being Flexible Intermediate Bulk Containers or Bulk Bags as they are more commonly known.

SME Steering Group – Stand A6

The NDA Estate Small and Medium Enterprises (SMEs) steering groups provide a forum to discuss improving the attractiveness and health of the market that supports the NDA sites, with particular focus on SMEs. There are five regional groups (Wales; Scotland; Cumbria; Northern England; Southern/Central England) to provide the SME sector with a direct and public voice to NDA.

Soilutions Ltd – Stand D11

Specialist contaminated soils and water remediation contractors and consultants.

Solcom Limited – Stand B16

We provide software development, control systems and prototype development services.

Sonomatic Ltd – Stand i27

Sonomatic are a solution provider for harsh environment inspection services. We specialise in bespoke solutions but strive to provide technology from our extensive range of tools to deliver within tight budgets. Come and see our latest development -Microwave composite inspection and corrosion under insulation.

SSA – Stand N1

An alliance of the nuclear decommissioning estate's nine client organisations who collaborate in the procurement of shared goods and services from the supply chain. We also act as the hub to facilitate and integrate supply management, development and engagement activities across the nuclear decommission estate.

Stainless Metalcraft Chatteris Ltd – Stand C1

Metalcraft are an award-winning UK based SME who have been manufacturing high integrity safety critical equipment for the nuclear industry for more than 40 years. We have a world class ILW container manufacturing facility on our site to support both the NDA and global decommissioning challenge.

Steve Vick International – Stand i30

Established in 1981, Steve Vick International is at the forefront of expanding sealant technologies. Our products and services involve permanently sealing off, decommissioning and diverting all types of pipework, ducts and voids in a wide variety of situations including underground and underwater.

Strata Technology Ltd – Stand H10

Strata Technology is one of UK's leading specialist process engineering companies and at the forefront of engineering innovation since 1998. Strata designs, manufactures, commissions, inspects and maintains bespoke laboratory equipment, skid mounted rigs and pilot plants for research and development, process scale-up or production purposes.

Studsvik – Stand C4

Studsvik are a leading supplier of consultancy services to the NDA Estate. We specialise in Radiation Protection, Radiological Characterisation and Full Lifecycle Waste Management. We have grown successfully in 2017 and are delivering projects at LLWR and Magnox. Studsvik is also part of the PBO at LLWR.

SUEZ – Stand N7

Water Technologies & Solutions are part of SUEZ, a world leader in designing and implementing sustainable resource strategies. SUEZ provides water and wastewater solutions from water purification and conditioning to the complete management of your overall water and effluent systems.

Symetri Ltd – Stand A10

Symetri provide our clients with expert guidance covering everything from 3D modelling and simulation to Product Lifecycle Management, Building Information Modelling and Facility Management.

Tannahill Reay Visual Communications Ltd – Stand G6

Tannahill Reay is a highly energetic visual communications agency at the cutting edge of digital production. Working tirelessly since 1984 to help our ever-growing customer base, which includes an enviable roster of major international brands to unleash the full potential of their visual assets.

The Nuclear Industry Benevolent Fund

The Nuclear Industry Benevolent Fund is a registered charity supporting those working in or who have worked in the UK Nuclear Industry and their dependants.

The Oil and Gas Technology Centre – Stand i42

The Oil and Gas Technology Centre goal is to help maximise economic recovery from the UK continental shelf, anchor the supply chain in the North-East of Scotland, and create a bright future for the region as a thriving global technology hub.

Thomas Consulting Ltd – Stand H8

Thomas Consulting are Chartered Civil & Structural Engineers. We are UKAS Accredited for our ISO9001, ISO14001 & OHSAS18001 Systems. We have current contracts for EDF Energy & BAE Systems in the UK & overseas. Specialist services include Seismic Qualification of Nuclear Structures using Finite Element Techniques.

Thomas Graham and Sons Ltd – Stand P4

A family run business that supports the Nuclear industry Nationwide that also incorporates the Magnox sites, offering a one stop shop in the supply chain.

Topspeed Couriers Ltd – Stand E8

Topspeed's core business has been the provision of event, process & time-critical courier services including Class 7 transport of Radioactive Material under ADR for Site Licenced Companies and supporting business. All vehicles are secure and fully tracked with the latest technology satellite systems ensuring security and certainty for all consignments.

TotalDECOM Mission Hub Ltd – Stand K1

TotalDECOM Mission Hub is a unique platform offering our cross sector subscriber network a world of decommissioning opportunity. Through our events, products and services portals - companies of all shapes and sizes can Learn, Connect & Do Business.

Tradebe Inutec – Stand L2

Tradebe Inutec is a leading provider of radioactive waste treatment and disposal services. Working from Nuclear Licensed premises and with our incineration facility, we provide turnkey solutions to complex waste issues. Services include analysis, characterisation, supercompaction, encapsulation, de-tritiation and incineration.

TSP Engineering – Stand J9

TSP Engineering delivers high quality, innovative bespoke solutions. As a technical solution provider, we offer a full range of services including project management, design, manufacture, refurbishment and in-house testing facilities.

TUV SUD Nuclear Technologies – Stand G12

TUV SUD Nuclear Technologies – UK based consultancy; 45+ employees specialising in:

- Radioactive/environmental waste management
- Radiation physics
- Shielding/criticality design
- Decommissioning strategy development
- Safety case authoring/management
- Optioneering

With an extensive associate base augmenting our in-house capability, plus access to the wider TUV SUD group.

TWI Ltd – Stand i2

TWI helps organisations all over the world achieve their most critical objectives, through successful application of joining technologies and ancillary operations support. TWI's power industry experts provide expert assistance at all levels in the nuclear decommissioning supply chain.

UK Screening Solutions – Stand D7

UK Screening Solutions was established in 2010 providing drug & alcohol screening to the nuclear industry. Our business has evolved into one of the leading providers of Occupational Health services to a range of clients from the Nuclear, Construction, Manufacturing, Energy & Local Government sectors.

UK Space Agency – Stand i23

The UK Space Agency, an Executive Agency of the Department of Business, Energy and Industrial Strategy, is responsible for the UK Government's Civil Space Strategy. Our remit is wide ranging and includes National and International Policy, Regulation, Education, Technology Development and Application Programmes.

UKAEA – Stand M3

The UKAEA has experience building, operating and maintaining fusion reactors. We offer scientific and technological expertise, proven research capabilities and unique, purpose-built facilities. We provide technical support to industry to win new business, helping sustain and grow employment, and support international trade and joint development projects.

Ultra Electronics - Nuclear Control Systems – Stand H7

Ultra Electronics Nuclear Control Systems specialise in the supply of radiation detection systems to the nuclear industry. Product supplied include measurement instruments for dose-rate, contamination and the measurement of radioactive concentration in air and liquids. Ultra Electronics NCS supports operating NPP's, fuel cycle facilities and decommissioning projects around the World.

University of Bristol – Stand S5

We are a university programme involved in training, innovation and research in civil nuclear energy.

University of Cumbria – Stand S14 & S15

We are delivering the project academy for Sellafield and are one of the founding partners of the National College for Nuclear.

University of Sheffield – Stand i40

The University of Sheffield is a world leading provider of innovation, training and education in nuclear decommissioning, with a team of >100 researchers, and unique facilities in the academic sector for transuranic materials science, we are ranked first for nuclear research expenditure in the UK.

URENCO Nuclear Stewardship – Stand C11

URENCO Nuclear Stewardship Ltd, previously Capenhurst Nuclear Services Ltd, a leader in the field of nuclear stewardship and end of cycle management solutions for the nuclear industry. A subsidiary of global enrichment organisation, URENCO Ltd, URENCO Nuclear Stewardship provides responsible waste management and decommissioning services.
www.urenco.com/urenconuclearstewardship

Valve & Fitting Solutions – Stand C16

Valve and Fitting Solutions are the UK Distributor for the HAM-LET range of stainless steel double ferrule tube fittings, instrumentation valves and auxiliary products in the UK. We also supply custom fabrications and assemblies to provide value added parts and services. All HAM-LET fittings are certified.

Veolia Nuclear Solutions – Stand i5

Veolia Nuclear Solutions brings together several highly advanced technologies and capabilities, building on the heritage and experience of industry leaders and innovators.

VINCI Technology Centre UK Limited – Stand L11

We have been involved in the Nuclear Sector since the 1950s, services include:

- Long term care & maintenance of structures
- Drop tests of waste flasks (indoor facility)
- Concrete investigation, mix designs and trials
- Large/full scale mock-ups and trials
- Condition surveys including UAV

Viridian Consultants – Stand i14

Viridian Consultants develops disruptive innovation for the nuclear sector and is becoming the go to company for nuclear characterisation solutions. Our in-situ sensors, ViridiScope® and ViridiScan®, can be operated remotely and are safer, cleaner and faster than existing characterisation tools.

Vulcain Engineering Ltd – Stand D12

Vulcain Engineering is an engineering consultancy with extensive nuclear experience. We provide decommissioning and legacy management our services include; project controls, design, risk and waste management. We are currently involved in new build projects and have engineering and project teams at Olkiluoto and Flammanville EPR sites.

Wales Nuclear Forum – Stand J1

Acorn is a multi-specialist supplier of temporary, contract, permanent recruitment and training solutions to the public and private sectors. Industry leader of the Wales Nuclear Forum, the leading pan-Wales forum, providing a platform for strategic engagement between the nuclear industry and Welsh suppliers.

Walischmiller Engineering GmbH – Stand E15

For more than 70 years the German company Wälischmiller Engineering is a leading manufacturer of manipulators for high-radiation projects in the nuclear area. We offer unique, cost-effective and very smart solutions for safe remote handling and robotics – all made in Germany.

Welman Group – Stand K8

Welman Group of Companies are located in Greater Manchester, we provide Design & Manufacturing Engineering Technology, program management, tooling design and manufacture, special purpose machines. Design and Manufacture tooling and fixtures for various industries, Automotive, Aerospace, Nuclear and Oil and Gas.

Welsh Government – Stand P2

The nuclear sector in Wales is entering a new era, with a range of projects creating opportunities across all stages of the power generation lifecycle. Welsh Government is fully committed to creating and exploiting opportunities within the nuclear sector.

Westinghouse Electric Company – Stand M22

Westinghouse Electric Company is the world's pioneering nuclear energy company and a leading supplier of nuclear products and technologies to utilities globally. We provide comprehensive, integrated services to the global decontamination, decommissioning, remediation and waste management market including state-of-the-art solutions for the handling of spent fuel and the treatment, handling and storage of radioactive waste.

Westlakes Engineering Limited – Stand B6

Westlakes are an engineering consultancy providing civil, structural, environmental and attraction safety services in Whitehaven, Manchester and Preston. Our highly professional staff have vast experience in the nuclear industry and are fully conversant with nuclear design and decommissioning processes and procedures.

Westlakes Recruit – Stand G13

Westlakes Recruit is a recruitment consultancy based in Cumbria, specialising in Project Controls, Construction Claims, Professional Services and Corporate Functions throughout the UK. We are a collective of Project Management, Project Controls, Construction Claims and Recruitment professionals with over 45 years' experience; delivering results through intelligent, collaborative recruitment.

WF Senate – Stand C5

Rexel have been part of the MRO framework agreement since 1998 on Electrical & Instrumentation.

Wilde Analysis – Stand B1

Our nuclear experience, use of industry-standard tools, supply of SQEP and headquarters located near Manchester ensure we are well positioned to serve the needs of the nuclear industry. We are very familiar with seismic, impact and other dynamic analysis as well as pressure equipment codes.

Winchester Consulting – Stand S7

Winchester specialise in delivering consultancy and web-based solutions focused on supporting the 'attraction, development and retention' of people and skills across UK manufacturing, engineering and technology sectors. We're also responsible for delivering the TRS programme on behalf of Government (BEIS) and leading STEM sector organisations.

Witt UK Group – Stand J2

Founded in 1950, Fan Systems Group is widely acknowledged as one of the leading manufacturers of high quality industrial fans, control panels and monitoring equipment for the Nuclear industry.

Over eighty projects to date in fifteen separate countries from new build to decommissioning.

Women in Nuclear UK – Stand S10

WiN UK is a non-profit making organisation run entirely by volunteers. It's Executive Board sets direction to address the industry's gender balance by attracting more women to choose a career in the sector, support retention and career progression and promote dialogue with the public.

WOW NUCLEAR – Stand C25

WOW Nuclear UK introduces the Evaporator with Super Decontamination performance for HLW/ILW Liquid Radwastes known as WOW.

A purification system that has "granted" patents worldwide; this "Super Evaporator" allows separation of solvent from contaminants concentrating the residual waste orders of magnitude better than current methods.

WYG – Stand M25

WYG Engineering Ltd is a leading project management and technical consultancy employing over 1,600 people and operating from more than 50 locations across the UK, Europe, Africa, Asia and the Middle East. We specialise in creating and managing strategic assets for our clients. We engage with them in the early stages of a project, and often continue to advise them throughout its lifecycle.

YPS Valves Ltd – Stand M13

YPS Valves is a UK manufacturer of specialist & commodity stainless and high alloy valves supplying the Oil & Gas, Petrochemical, LNG and Nuclear markets. We manufacture and modify to suit end user applications. Our valves are designed in strict accordance with ISO 9001:2008 and PED Category 3, module H.
