

General Exhibitors

247 National Ltd - Stand L6

247 National Ltd part of the Surelock McGill, Mico, Stafford Bridge group of companies provide highly qualified and accredited security cleared engineers to install, service and maintain security doors and locks of all manufacturers to the highest standards. Experienced working at Nuclear and Government sites.

A.Taylor & Son (Leeds) Ltd - Stand B2

Established in 1864 A.Taylor is recognised as one of the UK's leading sub contract fabrication and machining engineers supplying high integrity bespoke solutions to a variety of industries including Nuclear decommissioning. Our capabilities cover all aspects from design and manufacture (up to 50 tonnes) to clean fabrication facilities and large assembly and testing bays.

AB5 Consulting - Stand C28

AB5 Consulting develops innovative solutions in an enabled environment. In the nuclear sector, we work mainly on the nuclear fuel cycle, transport and we support the development of IOT applications in nuclear.

Abakus Ltd. - Stand E1

We design and manufacture radiation-tolerant zoom and fixed lenses for the nuclear industry. Also available are through-wall systems for walls a metre or more thick. We are happy to design and make to customer's requirements, however demanding.

ABB Ltd - Stand O5

ABB is a pioneering technology leader in power grids, electrification products, industrial automation and robotics and motion, serving customer in utilities, industry and transport and infrastructure. ABB products and services support electricity transmission and distribution systems to bring electricity from any power plant to any plug.

Abbott Risk Consulting Ltd - Stand H16

Abbott Risk Consulting Ltd is an independent, British SME providing safety case and professional engineering services to the UK Nuclear Industry. We are pleased to be able to offer clients an independent, responsive, value for money and quality service, which has been demonstrated over many years working in the sector.

ACB Limited - Stand D2

Abbott Risk Consulting Ltd is an independent, British SME providing safety case and professional engineering services to the UK Nuclear Industry. We are pleased to be able to offer clients an independent, responsive, value for money and quality service, which has been demonstrated over many years working in the sector.

Actemium ICS - Stand D22

Adey Steel Ltd - Stand H10

Adey Steel is a leading steel fabricator, working across multiple sectors we offer customers expertise in survey, design, project management, fabrication and installation of steelwork projects. We are accredited Fit4Nuclear, CE Marking, 9001 & 18001 positioning us amongst the most capable fabricators across the UK.

Advanced Industrial Solutions - Stand B12

Advanced Measurement Technology - Stand O4

Advanced Measurement Technology (ORTEC) is an industry leader in the design and manufacture of ionizing radiation detectors, nuclear instrumentation, analysis software, and integrated systems.

General Exhibitors

AECOM - Stand L7

AECOM has provided multidisciplinary service solutions to clients in the nuclear industry for more than 40 years. We work collaboratively with our clients across the life cycles, to meet the new and ongoing needs of this complex and exciting segment of the power sector. The skills within our nuclear solutions team provide AECOM with an unrivalled expertise to support clients in a wide variety of roles to suit individual project needs.

Air Technology Systems - Stand H2

With several successful solutions installed in the Nuclear industry, ATS (Air Technology Systems) have been designing and providing innovative HVAC / Ventilation solutions for over 25 years. We actively encourage a collaborative approach to all projects, aiming to ensure that the Clients expectations are exceeded.

Altrad - Stand M11

Altran UK Ltd - Stand M9

AMELEC Instruments - Stand B5

43 Years Quality Manufacturing and Supply of analogue Signal Conditioning, Process Monitoring and Control Instrumentation for use throughout the Nuclear industry sectors. Seismic qualified Non-Smart instruments for SIL1, SIL2 and SIL3 rated Safety System Loop applications, Plant systems Life Extensions and Obsolescence support.

Ansaldo Nuclear - Stand C39

Ansaldo Nuclear Ltd design and manufacture bespoke engineering solutions for the nuclear energy, new build, defence and decommissioning markets. Wholly owned by Ansaldo Nucleare, part of Italian group Ansaldo Energia, they provide in-house and fully integrated capability, serving the UK Nuclear Market.

Aquila Nuclear Engineering Limited - Stand F6

Providing bespoke mechanical engineering solutions to the Nuclear Industry, Aquila's expertise covers four key categories: Containments, Shielded Facilities, Transport & packaging and Remote Handling.

Aspire Procurement Training Ltd - Stand C21

We are a CIPS approved provider of procurement training courses and work with many people in purchasing, supply chain, contract management & buying roles. Our tutors are all MCIPS qualified with global industry experience which results in students achieving some of the highest pass rates in the UK.

ATI UK - Stand N8

ATI is the leading designer and manufacturer of specialised testing equipment for HEPA filters, media, and protective masks, from portable units used for in-situ testing of HEPA filters to large test rigs used by major manufacturers and laboratories, all complemented by our renowned training academy.

Atomic Talent - B14

Atomic Talent is a recruitment business providing specialist search, contingency recruiting, project resourcing and resource management services across the UK Nuclear sector.

We're specialists in our field with over a decade of experience gained supplying into the industry and providing client-side resource management services.

Atos - Stand C9

We strive to create the firm of the future. We believe that bringing together people, business & technology is the way forward. At Atos, we embrace this journey, striving to remain the trusted partner that delivers digital empowerment to our clients.

Augean plc - Stand M13

Augean owns and operates key facilities that are strategically located throughout the UK for the treatment and disposal of Very Low Level Radioactive Waste (VLLW), Low Level Radioactive Waste (LLW) and Naturally Occurring Radioactive Material (NORM).

General Exhibitors

AWE - Stand M5

AWE plays a crucial role in the nation's defence by developing and maintaining the warheads for Britain's nuclear deterrent, on behalf of the MOD. Our scientists and engineers also offer government innovative solutions to combat nuclear threats, proliferation and terrorism, on a 24/7 basis.

Balfour Beatty Plc - Stand H19

From minor works to major infrastructure projects, Balfour Beatty has a proven record of civil engineering excellence.

BEL Engineering - Stand F4

BEL Engineering is a leading provider of project managed manufacturing solutions offering machining capabilities from 3mm diameter components to large 40-tonne workpieces. Operating from our integrated manufacturing facility in Newcastle-upon-Tyne, we serve the nuclear, energy, construction, defence, transport, marine, oil and gas markets.

Belman-UK Ltd - Stand C15

Bendalls Engineering - Stand E9

Bendalls Engineering services include design, project management, fabrication and testing. Design and manufacture of pressure vessels and specialist steel fabrications has always been a fundamental part of Bendalls capability and our rigorous adherence to safety and quality standards ensure we manufacture to the highest standards.

Bender UK - Stand C35

Bender is a global pioneer of electrical safety technology. Our solutions are proven in many industry sectors where power is critical. Capabilities include the design and supply of insulation monitoring and earth fault location systems, residual current monitoring and power quality and energy management products.

BENTELER - Stand J15

BENTELER PreFiS – XL products are manufactured to the highest quality work up to 630 bar, at temperatures between -55 and 400 C are chemical and diffusion resistant and guaranteed leak tight. With no need for specialised Pipe end preparation, skillsets, hot working permits, X-Ray costs or conventional on-Site requirements. Their unique nature means Fittings can be installed with minimum cost or risk.

Berkshire Engineering Supplies Ltd - Stand J4

Berkshire Engineering specialise in providing economical, high quality equipment solutions for Concrete/Grout production including remote handled Waste Encapsulation solutions. We can provide full turn-key solutions and also offer project support activities including Design, Trials, Manufacturing, Factory Acceptance, Installation and Inactive Commissioning for the Nuclear Industry.

Blackburn Starling & Company Limited - Stand F7

Blackburn Starling is a total solutions provider and manufacturer of LV Power Distribution Systems including conventional and intelligent Motor Control Centres, Switchboards, Package Substations, Bus Ducts and Instrumentation Panels.

Bourne Nuclear Limited - Stand B15

Bourne Nuclear Limited offers specialist design, manufacture and installation of bespoke steel fabrications to the defence and nuclear industry in the UK. The company brings together the direct experience of working on major projects in the nuclear sector with the size and capability of one of the largest UK specialist steelwork companies.

Britain's Energy Coast Business Cluster (BECBC) - Stand G9

Bureau Veritas UK Ltd - Stand O3

As the leading provider of nuclear inspections in the UK and a global leader in testing, inspection and certification services, Bureau Veritas understands the challenges of Nuclear New Build.

General Exhibitors

Business France - French Embassy - Stand C10

Business France - French Trade Commission promotes trade development between France and the UK. It offers a wide range of services to French companies, to assist them with their commercial development in the UK as well as helping UK companies to set up in France.

Cairnhill Structures Ltd - Stand H15

Cairnhill provide Solutions in Steel to the Nuclear Industry. We have our own in house Design, fabrication and Installation teams available. We have full QA accreditation and are CE marked to Execution Class 4.

Calder Engineering Ltd - Stand C32

Calder Engineering Ltd have been providing Mechanical Engineering services and solutions to the energy markets for over 30 years. We have a proven track record of delivering large and small fabrications, coded welding, machining, installation and maintenance projects to the nuclear industry.

Capula Ltd - Stand H7

With 50 years' experience in the nuclear industry, Capula supports the full life cycle of nuclear energy from existing generation to new build, waste management and decommissioning. Our control systems and solutions help clients optimise their research, design, manufacturing and maintenance operations whilst enabling regulatory compliance and safety standards.

Carbolite Gero Ltd - Stand G12

A leading manufacturer of high temperature furnaces and ovens from 30°C to 3000°C with a focus on vacuum and special atmosphere technology.

Carpenter & Paterson Ltd - Stand M6

Carpenter & Paterson Ltd are specialists in the design and manufacture of Pipe Support Equipment and Fabricated Steelwork established in the UK since 1956.

We have developed our range of engineered pipe supports in the UK for the worldwide market and are today a recognised market leader.

Cavendish Nuclear - Stand N5

Cavendish Nuclear is the UK's leading nuclear services company, with a highly-skilled workforce and a growing international presence. Our people innovate to make nuclear safer, faster, at lower cost across all aspects of the nuclear energy lifecycle.

CEMAR - Stand L1

Make contracts easy with CEMAR®, the cloud-based contract management system for NEC® and other forms.

Modern contracts are complex and expensive to administer.

CEMAR combines industry-leading knowledge and expertise to make sophisticated contract management simple.

Cerberus Nuclear - Stand J19

Cerberus Nuclear specialises in Radiation Shielding, Criticality Safety & Nuclear Characterisation.

We have over 45 man-years experience in supporting civil nuclear, defence, medical and high energy research industries.

Christians Environmental LTD - Stand C6

Christians provide innovative surveying and data collection services including inspection models removing the need to work at height, Building Information Modelling (BIM) services and UAV inspection and data collection services.

CINC - Stand K14

The Cluster of the Nuclear Industry of Cantabria (CINC) is a business organization created with the aim of cooperation and relationship between different companies of the nuclear industry sector located in Spanish Cantabria's region and joined by companies such as University, manufacturers of equipment and components, technology centers and service providers aimed of answering to the new technological challenges of the nuclear sector.

General Exhibitors

Clearnorth Recruitment - Stand D12

CLEARNORTH Recruitment - A Clearly Different Recruitment Experience clearnorth.co.uk
Engineering and Construction industries throughout the UK.

Costain Limited - Stand J7

Costain is an International Engineering Group providing World class capability in project management, engineering and technical innovations, to clients operating in the most challenging industries.

Crossword Cyber Security - Stand D9

Rizikon Assurance really helps you to assure your supply chain and allows you to really understand your Supply Chain Risk. Rizikon Assurance can help you look closely at Supplier Onboarding, H&S, ISO, GDPR, Cyber Assurance, Business Continuity and much more.

Crown Commercial Service - Stand C11

Crown Commercial Service, are the biggest public procurement organisation in the UK and help other organisations across the whole of the public sector find the right commercial solution for over £12 billion of spend each year.

Cyclife - Stand B1

Cyclife of EDF Group a European leader providing innovative cost-effective solutions for waste treatment and decommissioning. Capitalizing on the expertise, reputation and strengths of EDF Group, Cyclife are dedicated to your decommissioning projects and waste issues, arising from operation or decommissioning with a waste-led approach.

Darchem Engineering - Stand J17

Darchem Engineering specialise in the design, manufacture and installation of high quality Nuclear stainless steel fabrications. Over 50 years nuclear industry experience.

- Reflective Metallic Insulation
- Passive Fire Protection
- High grade Fabrications
- S/S Pool Liners/ In-Cell Linings
- Waste Containers
- High Integrity Ventilation Ducting
- Impact Energy Absorbers

DBD Ltd - Stand D10

DBD is a professional engineering and advisory company to highly complex and regulated industries. We provide specialist engineering, project management, and consultancy services which reduce risk, add value, facilitate positive change to all your Nuclear engineering, construction, decommissioning, and waste management projects.

DEF Energie & Environnement - Stand B7

DEF Energy and Environment is a company specialised in fire safety solutions for the nuclear market. From design to manufacturing and after sales services, our experienced team accompany our partners on various applications (Nuclear plant, research, waste management or decommissioning) all over the world.

Department for Business, Energy and Industrial Strategy - Stand C38

The Department for Business, Energy & Industrial Strategy is building an economy that works for everyone, so that there are great places in every part of the UK for people to work and for businesses to invest, innovate and grow.

Department for International Trade - Stand C40 & C42

DIT secures UK and global prosperity by promoting and financing international trade and investment, and championing free trade.

Direct Rail Services - Stand J12

Provider of nuclear transport via rail.

General Exhibitors

Doosan Babcock - Stand H9

Doosan Babcock is a specialist in the delivery of engineering, aftermarket and upgrade services to the power generation, oil and gas, petrochemical and process sectors. With a focus on the delivery of low-carbon technologies and an industry-leading project management capability, the company builds, maintains and extends the life of customer assets worldwide.

Dormor Machine & Engineering Company Ltd - Stand D13

Long established medium capacity sub contract machining and engineering service offering Turning, Milling Horizontal and Vertical Boring – We can manufacture individual components or high volume, including fully assembled components. Components up to 2.5 mtr. diameter and up to 6 mtr. in length.

Dounreay Site Restoration Ltd - Stand O1

For more than 50 years Dounreay was known as the centre of the UK's fast reactor research and development. Now it is Scotland's largest decommissioning project, widely recognised as Europe's most complex nuclear closure programme, and the team is aiming to be recognised as a centre of excellence for nuclear decommissioning.

DR Technologie - Stand C10

DR Technologie provides bespoke solutions to optimise workplace safety. Their equipment improves both working conditions and the efficiency of workers in high-risk and complex environments (FME, BR, BK, radiation protection, etc).

DSA - Stand L8

The Design Services Alliance (DSA) provides nuclear design, engineering and safety case services to Sellafield Limited. It is a fifteen year framework that was established in 2012 and has a sanction of £1.5 billion. The DSA comprises of the Sellafield, Wood, Jacobs, Mott Macdonald, Assystem, Cavendish and Aecom.

Duuzra - Stand A2

Eadon Consulting Ltd - Stand L9

Eadon Consulting are experts in the design and analysis of high integrity handling equipment, access solutions and specialist structures, including their seismic and dynamic analysis. Our experience across multiple sectors promotes problem solving and innovation, from concept to through to detailed design.

Eckert & Ziegler Environmental Services Ltd - Stand J14

Eckert & Ziegler's experienced team operate both domestically and internationally from our bespoke, highly secure, permitted facility providing unrivalled access to recycling / disposal facilities and return to manufacturer.

eCom Scotland - Stand C7

eCom helps clients develop a capable workforce to accomplish their goals, achieve business efficiencies and financial savings. Through the Comply module of eNetEnterprise, our flexible workforce development system, we make administering compliance training easy. Comply supports competency tracking anywhere, even without an internet connection.

EIC - Stand H5

The Energy Industries Council (EIC) is the leading trade association for companies working in the global energy industries.

EMCEL Filters Ltd - Stand E5

EMCEL provides a complete service to R & D Departments, Project Engineers and Consultants :- from initial design concept, CAD drawings, prototypes, testing through to final production. EMCEL supply a range of particle and carbon filters, including special high temperature versions for the Nuclear Power Generation & Isotope Production industries.

General Exhibitors

Equipos Nucleares S.A., S.M.E - Stand K13

Ensa offers tailored solutions to Nuclear Power Plants and other Nuclear facilities from the beginning of the operation to final Decommissioning, such as equipment supply, maintenance, repair activities or waste treatment. We have an Advanced Technology Center with accredited laboratories for metrology requirements and material testing.

ERIKS - Stand F21

ERIKS, a multi-product specialist offering a wide range of engineering components and technical services to all areas of industry. Our know-how and expertise is focused on the areas of flow control, drives and power transmission, fluid power, sealing technology and tools, safety and maintenance products.

European Heathyards - Stand K2

European Heathyards are specialist in high integrity fabrication, welding & tube manipulation. Our products include, pressure vessels, heat exchangers, platework & pipework. We are accredited to ISO 9001,14001,18001,27001 BSEN 1090 & hold ASME U,S,PP & R stamps

Extreme Cases - Stand N11

Extreme Cases design, manufacture and supply robust rugged cases, containers and backpacks for tough environments. Protecting sensitive equipment in the field, during transit and in operation for military and commercial applications.

Falck Fire Services UK Limited - Stand F19

Falck is the leading international provider of industrial fire and rescue services for airports and high-risk industries, including petrochemical plants, nuclear power plants, steel plants and automobile manufacturers.

FAYAT Lifting / ETNA - Stand G17

FAYAT Lifting Ltd provides handling and lifting equipment for the nuclear industry such as overhead traveling cranes, unloading gantry cranes, storage cranes and special tools. We specialize in bespoke handling solutions for new build, maintenance, retrofitting, decommissioning and dismantling nuclear projects.

Fluidic Limited - Stand F15

Fluidic is a notable supplier of instrumentation products to the NDA Estate. We represent 12 manufacturers with experience of manufacture for the nuclear sector and 6 of these are also UK SME's.

Fort Vale Nuclear Ltd - Stand C23

Fort Vale Nuclear Ltd provides machined and fabricated components to supplied drawings or the development of design concepts, through to general arrangement and engineering drawings followed by subsequent manufacture.

Forth Engineering - Stand K11

Franks Portlock Consulting Limited - Stand F2

Asbestos & Environmental Consultancy specialising in Asbestos Surveying, Testing, Inspection, Compliance Management and Training. UKAS accreditation for Inspection (ISO 17020) & Testing (ISO 17025). Experienced Nuclear Professionals with a proven reputation for supporting the nuclear industry throughout all stages of Asset Management, Remediation and Decommissioning.

Frazer-Nash Consultancy - Stand G11

Frazer-Nash is a leading systems and engineering technology company. We're renowned for our work in the nuclear, defence, aerospace, transport, marine industrial, power and energy sectors. The breadth of expertise and the insight we apply deliver successful outcomes.

General Exhibitors

Fugro GeoServices Ltd - Stand B20

Fugro is a leading international provider of geo-intelligence and asset integrity solutions with expertise extending from pre-construction site investigation to measurement, monitoring and testing throughout the asset life, including decommissioning.

GAP Group Ltd - Stand G10

GAP Hire Solutions is the UK's largest independent and family-owned equipment rental company. GAP's eight divisions comprise Plant & Tool Hire, Lifting Hire & Sales, Non-Mechanical Plant, Survey & Safety Hire, Welfare Services, Event Services, Vehicle Hire and London Tools & Access.

GAU-Radioanalytical - Stand D1

GAU-Radioanalytical Laboratories (GAU) is a long-established and experienced commercial group providing radioanalytical services, consultancy and research support for government, industrial and academic sectors.

GBC Industrial Tools Limited - Stand C33a

GD Energy Services - Stand F18

GEL Laboratories UK Ltd - Stand J9

GEL specialises in waste characterisation of LLW & ILW for the UK, USA and sites around the world. GEL is known for its rapid turnaround times and ability to handle exotics and orphan waste.

Gleeds Energy Ltd - Stand B4

Gleeds Energy have over 35 years experience in the nuclear sector providing cost and commercial management, estimating, procurement strategy and pre and post contract management.

Goodwin International Ltd - Stand H18

Our customers benefit from our facilities and expertise which enables us to provide complete project solutions, including design assessment, risk mitigation, raw material purchase, heavy precision machining, testing and inspections, for the most complex and critical applications. This allows us to provide a one-stop build to print service.

Gow's Lybster Ltd - Stand O2

Gow's Lybster have been carrying out major mechanical contracts within the Nuclear Industry for over 30 years and have a proven track record to deliver safely, on time and to budget, collaboratively partnering with the industry to help solve their unique bespoke challenges.

Graham Engineering Ltd - Stand C29

Graham Engineering is primarily a manufacturer in Stainless steel to a wide variety of market sectors. These include bespoke fabrications, product and waste containers to the Nuclear Industry such as WVP Flasks, MBGW Boxes, 500L ILW drums, UO3 drums, packages for Special Nuclear Materials.

Grundon Waste Management - Stand N3

Grundon offer a total waste management collection and disposal service for your low-level radioactive waste. Our pre-acceptance process ensures your waste disposal is fully compliant with; Environmental Permitting Regulations, Carriage of Dangerous Good & ADR Transport Regulations, Ionising Radiation Regulations and Hazardous Waste Regulations.

Harrison Network - Stand G3

Get better results through positive people. For leaders that connect, teams that collaborate and coaching mindsets, we'll be by your side. Practical tools for powerful conversations across the Supply Chain. Shortlisted for Microbusiness of the Year BECBC 2018.

Hazmat Logistics Ltd - Stand E13

Hazmat Logistics Ltd offers an international service for the transport of dangerous goods, specialising in the movement of radioactive materials. Our drivers are full ADR certified and operate within UK, Ireland and the Continent and we provide a worldwide logistics service by air and sea.

General Exhibitors

HKA - Stand C8

HKA provides consulting, expert and advisory services for the development of major projects, programmes and assets around the world, working to achieve clarity and certainty for clients in delivering their outcomes.

Hosokawa Micron Ltd - Stand B26

Hosokawa Micron Ltd. provides a wide range of solutions for the processing and containment of hazardous materials including Gloveboxes, Fume Cupboards, Micronisers, Mixers, Blenders, Vacuum dryers, Freeze Dryers & Compactors as well as IOT & Industry 4.0 systems integration and remote monitoring of process plant.

HPC - Stand H13

HPC is a worldwide PPE manufacturer dedicated to the Nuclear industry at all stages including decommissioning since more than 40 years.

Huntingdon Fusion Techniques Ltd - Stand H12

HFT have been in business for over 40 years and are inventors, designers and manufacturers of pipe purging products, pipe plugs and stoppers and freeze plug kits. They sell mainly to any industry using stainless steel or exotic alloys including nuclear and decommissioning.

Hyde Group Nuclear Ltd - Stand C31

Hyde Group Nuclear is a manufacturing business providing specialist manufacturing services to the nuclear and defence sector

IDOM - Stand H14

IDOM Nuclear Services is a multi-disciplinary engineering business with a 30 year heritage in the nuclear industry. We provide professional services to the nuclear sector around the world, with activities in new build, power generation, radioactive waste management, decommissioning, medicine and research.

igus - Stand N9

IHS Markit - Stand D3

IHS Markit help the nuclear industry innovate and collaborate, using our online platforms to access external standards and engineering technical information and internal knowledge.

Indelible Data Ltd - Stand C13

Offering Pen Testing, Cyber Essentials Certification, GDPR consultancy, security awareness training and ISO 27001 consultancy, Indelible Data could be your one-stop shop for information assurance. We have a 500-strong customer base, many within the nuclear supply chain, and our business is built on reputation.

Independent Forgings & Alloys Ltd - Stand J11

IFA is a premium supplier of high integrity forged products to quality markets around the world. From raw material ingot to near net shape semi-finished components. Serving critical service environments in the Aerospace, Nuclear, Oil & Gas, Marine and Power Generation sectors.

INS - Stand G8

IT4Automation Ltd - Stand C20

IT4A are a Digital Security Solutions Company providing cyber and site-wide, integrated security solutions for Critical Infrastructure. We represent the leaders in field of cyber security and industrial network infrastructure. IT4A provide multi-discipline project engineering, technical support, maintenance and product supply into the nuclear sector.

General Exhibitors

Jacobs - Stand F12

Jacobs has supported the UK nuclear sector for over 60 years. We deliver value and innovation to technically challenging and complex nuclear projects, offering unrivalled full life-cycle solutions, multidisciplinary capabilities, technical expertise, proven processes. Our decommissioning clean-up programmes deliver services to the full NDA estate.

James Fisher Nuclear - Stand F14

A leader in specialist engineering, manufacturing and technical services for challenging, high integrity and high hazard, applications.

JCS Nuclear Solutions - Stand F11

JGC Engineering and Technical Services Ltd - Stand C36

Specialists in high tolerance/ high specification fabrication, manufacture, assembly & testing. Wide range of expertise in nuclear plant dismantling and decommissioning processes. Over 35 years experience of working within the UK nuclear industry. Established, experienced, highly skilled and flexible workforce.

Jordan Manufacturing Ltd - Stand G6

Jordan are well-known for the manufacture, fabrication, welding and assembly of bespoke equipment in carbon steel, stainless steel and complex alloys for high specification industries, including as Nuclear, Defence, Infrastructure, Oil & Gas, Architectural, Process, Pharmaceutical, Marine and Water.

KBR - Stand K12

KDC Contractors Limited - Stand B22

KDC serves the nuclear; oil gas and process; pharmaceutical and industrial markets and provides decommissioning services including strategy development, decontamination, de-planting, demolition and land remediation.

King Trailers Ltd - Stand B11

King is the UK's largest manufacturer of abnormal loads up to 150 tonnes. Whether its construction equipment and plant, or trailers for the nuclear industry, then King can provide the solution.

Kloeckner Metals UK - Stand J10

Kloeckner Metals UK is the largest mill independent multi-metal stockholder, processor & distributor in the UK. We offer a diverse range of ferrous and non-ferrous products processed to customer specific requirements.

Konecranes Demag UK Ltd - Stand K6

Konecranes brings the expertise of Konecranes Nuclear Equipment and Service (KNES) providing cranes for nuclear facilities worldwide, we also provide cost effective, fast track designs using our high-quality COTS components. Our extensive service network services all makes and models of material handling equipment worldwide supporting the nuclear industry.

KUKA Systems UK Ltd - Stand J13

KUKA Systems UK Ltd, are a supplier of automated, semi-automated and manual systems to nuclear decommissioning and waste projects. We supply bespoke systems globally for low level and intermediate waste projects.

Lake Vent Engineering Ltd - M3

Langfields Ltd - Stand F13

Langfields are specialist fabricators of process plant for the Pharmaceutical, Chemical, Offshore, Oil & Gas, Marine, Defence, Nuclear and other process industries.

General Exhibitors

Lionweld Kennedy - Stand G15

Lionweld Kennedy specialise in the Design, Supply and Installation of Steel and GRP access solutions. This includes flooring, handrail, stairs, platforms and all associated steelwork. With over 100 years' experience, we hold a unique position as the only UK manufacturer of steel gratings.

LISEGA Limited - Stand J1

LISEGA provide a complete range of pipe supports for the power generation & process industries. We provide standardised & bespoke designs, and our range covers everything from simple ubolts through to complex Hydraulic snubbers. Hardware is supplemented with product and application design and on-site services.

LKAB Minerals Ltd - Stand C12

LKAB Minerals heavy aggregate MagnaDense is used in the production of high density concrete for ILW decommissioning containers, walls and structures to improve radiation shielding performance. The naturally occurring mineral is inert and approved for use by several organisations under the NDA umbrella.

LLWR - Stand N1

LLW Repository Ltd delivers a range of services to customers that enable them to better manage their radioactive wastes. It manages the UKs Low Level Waste Repository in West Cumbria on behalf of the Nuclear Decommissioning Authority (NDA) and is currently planning and designing the next major phase of site development to commence capping of the existing waste vaults via its Repository Development Programme.

LPA Channel Electric Ltd - Stand K3

LPA Channel is a leading supplier of components and systems to the Aviation, Defence, Marine and Railway markets. Their Nuclear product ranges Includes Hermetically Sealed Relays and Timers, LED Lighting, Connectors, and Cable Management Systems.

Lubbers Transport - Stand A4

We specialize in out of gauge, ADR and dangerous goods logistics. Clients recognize us for having top-notch logistic expertise, a reliable global network and a personal touch.

Lynkeos Technology Ltd - Stand H13

Lynkeos Technology Ltd is an award-winning Scottish company that specialises in the field of cosmic-ray muography, which uses naturally-occurring background radiation to inspect the contents of complex structures such as nuclear waste containers. In September 2018, Lynkeos established a world-first demonstrator facility at Sellafield.

M5tec ltd - Stand G13

M5tec is a SME located in Newton Aycliffe, County Durham, England. Our team consists of experienced, multi-disciplined and enthusiastic engineers who are committed to successfully delivering engineering excellence on every project.

Mabey Group - Stand E11

Mabey is a leading international bridge and engineering specialist. Our engineering capabilities include design, manufacture and installation of permanent and temporary bridges; design and provision of temporary works including propping, jacking, formwork and falsework systems; structural and environmental monitoring and hire of non-mechanical groundworks equipment.

Magnox - Stand B16

Magnox, owned by Cavendish Fluor Partnership, is the management and operations contractor responsible for twelve nuclear sites and one hydroelectric plant in the UK. Our work is as diverse as it is challenging, ranging from electricity generation through to defuelling sites at the end of generation and the introduction of innovative techniques to accelerate decommissioning and clean-up. We have outlined a number of strategic goals which will mark our progress along the route to safely delivering our sites into care and maintenance.

General Exhibitors

Mammoet - Stand B9

Mammoet helps clients improve construction efficiency and optimize the uptime of plants and installations. For that purpose, we provide solutions for lifting, transporting, installing and decommissioning large and heavy structures.

Marick Partners - Stand A1

Marick is an integrated creative services agency specialising in communications, events, video and design. We are the organisers of today's event.

Marine & Industrial Plastics Ltd - Stand F1

Marine and Industrial Plastics is an established (1957) privately owned business specialising in remote handling. Our primary manufacturing items are bespoke and industry standard glove ports and glove box/cabinet screens which we supply to the nuclear and life science industries.

Marubeni Europe - Stand K9

Marubeni is dealing with trading and investments in various spheres in more than 60 countries/regions and have more than 400 consolidated subsidiaries/associates. Marubeni's energy division has nuclear related units (including Risley office in Warrington) covering the whole nuclear fuel cycle, creating a strong value chain.

Matom Ltd - Stand B12

Matom Ltd, a UK SME, is a Tier 2 provider of Health Physics, Radiological Protection, Decommissioning and Waste Operatives to the NDA. In addition to operational resource, Matom also provide professional and consultative services across the estate.

MC Air Filtration - Stand N2

M C Air Filtration are a Tier 2 supplier to Sellafield Limited and currently hold the NDA framework agreement for filters. We supply high efficiency filters and associated equipment to the whole UK nuclear estate.

McCarthy Environmental Ltd - Stand F20

Independent specialists providing LEV and extraction systems to control harmful substances and fumes arising from engineering and manufacturing operations. With a full range of quality products alongside our bespoke manufacturing capability, we deliver cost effective solutions that exceed health and safety legislation within demanding environments.

McEvoy Engineering Ltd - Stand C30

Steel Fabrication, Pipework and Integrated Engineering with 28 years of nuclear sector expertise. CE Marking to EXC 4. Experienced and confident in meeting stringent quality & SQEP standards. Supplier to EDF, Magnox and Sellafield.

MDCO Ltd - Stand H1

MDCO is the UK's leading supplier of decontamination wipes and chemicals. MDCO offer innovative solutions to decommissioning issues and its range of decontamination chemicals ensure high product performance, reduced waste and cost savings to site. Experienced personnel provide on-site training and advice on decontamination cleanup operations.

MechaTech Systems Ltd - Stand D7

SME specialists in design, manufacture and service of Freeze Dryers, S35 Gas Sampling Systems, and High Vacuum Systems, including award-winning Advanced Vacuum Drying System (AVDS), a proven solution for conditioning nuclear waste for long-term storage in its original, disposable container.

Menai Science Park - Stand N9

Menai Science Park, trading as M-SParc, is Wales' first dedicated Science Park. Located in North West Wales, M-SParc aims to Ignite Ambition, providing office, laboratory and clean workshop space for companies in the low carbon, energy and environment, and ICT sectors.

General Exhibitors

Merlinworks Ltd - Stand M1

Merlinworks Ltd is a Safety Case, Engineering and Technology company based in Caithness, supporting decommissioning as part of the Dounreay supply chain. Merlinworks looks to facilitate safety driven engineering projects by bringing together Safety Case and Engineering, supporting integration with technology.

Millbank Holdings Ltd - Stand K10

Millbank are a specialist recruitment agency that has provided recruitment support to the recruitment industry for over 30 years. We work with a number of engineering contractors and consultancies supporting both civil and nuclear defence projects.

Mirion Technologies (Canberra UK) Ltd - Stand L2

We are one of the UK's leading suppliers of instrumentation for Spectroscopy, Characterization, Health Physics and Environmental Monitoring to the nuclear industry. We have offices in Harwell, Farnborough, Seascale and Forss.

Mitie Engineering Solutions - Stand C26a

Mitie Engineering Services operating as OneFM deliver facilities services across NDA, Sellafield Ltd, LLWR, DRS and INS properties.

MMI Engineering - Stand C3

MMI Thornton Tomasetti optimise the design and performance of structures, materials, processes and systems for projects of every size and level of complexity by engineering practical solutions that support the management of risks to life across a diverse range of nuclear, defence, power, hydrocarbon and civilian applications.

MOD - Stand M8

The Submarine Delivery Agency (SDA) was launched as an Executive Agency¹ of the Ministry of Defence (MOD) on 1 April 2018. It employs both civilian and military staff and is based predominantly at the MOD Abbey Wood site, but also has representation at other locations, including Her Majesty's Naval Bases Devonport and Clyde, and at key supplier sites. The SDA is a crucial part of the nuclear enterprise, who together with the Defence Nuclear Organisation and Navy Command, keep safe and capable submarines at sea today and in the future – providing the UK's strategic deterrent and supporting global security.

Mona Lifting Ltd - Stand K1

Mona Lifting Ltd have manufactured innovative lifting and engineering products for the power and manufacturing industries since 2004. Specialising in the design, manufacture and installation of overhead cranes and providing bespoke lifting and engineering solutions. Site personnel hold full security clearances and are Radiologically Classified Workers.

Morgan Sindall Construction & Infrastructure Ltd alongside the Infrastructure

Strategic Alliance contract (Sellafield Ltd working with Morgan Sindall and Arup) - Stand D20

Morgan Sindall is a UK construction and infrastructure business. The company works for private and public sector customers on projects and frameworks from £50,000 to over £1 billion. Morgan Sindall is a delivery partner on the Infrastructure Strategic Alliance contract which is being delivered for Sellafield Ltd in Cumbria.

Mott MacDonald - Stand L11

Mott MacDonald is a global engineering, management and development consultancy. Our multidisciplinary team delivers engineering projects within the nuclear and defence sectors. We manage and develop conceptual engineering solutions providing end-user focused designs for all aspects of nuclear engineering delivering world-class safety, environmental, technical and security performance.

MRP Systems - Stand N7

MRP Systems manufacture mobile radiation and blast barriers that are constructed of hollow polyethylene blocks which can be filled with a variety of materials and which interlock together to provide an easily assembled and relocate-able shielding system.

General Exhibitors

N-ERGISE Ltd - Stand K4

Engineering and Fabric Maintenance services, including Welding, Fabrication, Electrical, Scaffold & Painting, Rope Access, Inspection and Testing.

Navartis - Stand E8

Formed in 2006 Navartis work as a preferred supplier to many of the UK's leading consultancies, contractors and infrastructure owner and operators to supply highly skilled technical and management professionals to infrastructure projects within the global Power & Utilities, Rail and Civil & Construction Industries.

NIASS Limited - Stand E12

NIASS provides independent Business Development and Bid support services to organisations in the Civil Nuclear and Defence sectors

NIC Instruments LTD - Stand B18

Design & Manufacturer of High Threat Search, EOD, C-IED and CBRNe equipment, including ZEUS, the Ultimate Modular Unmanned Ground Vehicle.

NIS Limited - Stand G18

A multidiscipline engineering organisation who are proud to provide bespoke, pragmatic, design and manufacturing services to a range of clients working across quality driven sectors.

Northern Valve & Fitting Company Ltd - Stand B8

NVFC are an engineering consumables distributor for Stainless Steel and exotic alloy valves and fittings.

Nu-Tech Exhibitions + Events - Stand C37

Since 1993 we have been a leading provider of 'On-site' Industrial Exhibitions to key operational sites around the UK, as well as offering a full range of conference and event management services in support of the UK's Nuclear, Defence, Maritime, Aerospace, Petrochemical and Science & Technology-related Sectors.

Nuclear Decommissioning Authority - Stand B6

Nuclear Engineering International - F17

Published continuously since 1956, Nuclear Engineering International is an independent technical magazine that covers all aspects of civil nuclear power generation globally. In-depth articles spanning areas from new-build to decommissioning are available across print and digital platforms, attracting audiences from well-established markets to newcomer countries.

Nuclear Forum - Stand C27

The leading network for business development opportunities in the nuclear industry supply chain. The Forum members, both large and small businesses, see mutual benefit in sharing their collective business knowledge. The Forum offers invaluable knowledge sharing and networking, supporting locally based SMEs and facilitating closer collaborative working.

Nuclear Industry Association - Stand D6

The Nuclear Industry Association (NIA) is the trade association for the civil nuclear industry in the UK. It represents more than 250 companies across the UK's nuclear supply chain. The diversity of NIA membership enables effective and constructive industry-wide interaction.

Nucleus - Stand C4

Nucleus provide specialist nuclear services across laboratory and desk-based research, waste management and decommissioning, and safety case management, bringing together a unique collaboration of key suppliers and SMEs with an extensive breadth and depth of expert knowledge.

General Exhibitors

NUKEM Technologies Engineering Services GmbH - Stand G20

NUKEM Technologies Engineering Services in Alzenau, Germany, is world-wide active in the areas of radioactive waste management, handling of spent fuel, decommissioning of nuclear facilities, nuclear engineering and consulting with more than 50 years of experience. Since 2009, NUKEM Technologies is part of the ROSATOM-Group.

NW Total Engineered Solutions Ltd. - Stand E3

Manufacturing and engineering company specialising in Pumps, Valves, Process Equipment Packages, Fabrication Works and M&E installations. We have in-house NDT inspection and coded welders for steels and exotic alloys which allow us to manufacture up to Quality Grade 02 for the Nuclear Industry.

Oldham Engineering Ltd - Stand J2

Oldham Engineering Ltd remains a preferred supplier to the Nuclear, Defence, Rail, Steel, Oil & Gas, Subsea & Power Generation industries. Expert Turnkey Project Management, CAD/CAM, Coded Fabrication, Medium-Heavy CNC Machining, Robot Welding and Complex Assembly & Testing.

Omniflex UK Ltd - Stand H11

Omniflex remote monitoring specialists supply the UK Nuclear Industry's NDA 2016 Innovation award winning Radiological Surveillance Systems, "Emphasis Assessed" (SIL1) Alarm Annunciators, Trip Amps, signal conditioning products, Radiation Door Warning Signs, Slave Alarm Units, Sequence Of Event and any other remote monitoring applications.

OSBIT Ltd - Stand G16

Osbit designs and builds bespoke equipment for use in oil & gas, renewable and nuclear environments. The company has a strong track record in delivering safe, high-quality engineering solutions On Spec, Budget and In Time.

Outokumpu Stainless Distribution - Stand F3

PacTec EPS Ltd - Stand C14

PacTec EPS engineer, design & manufacture certified IP1/IP2 innovative 'fit for purpose' packaging for safe containment solutions transportation, storage & disposal of VLLW, LLW, ILW and exempt wastes.

PDL Group - Stand J6

Trusted by hundreds of clients with their safety critical projects and complex engineering challenges; PDL are world leaders in engineering analysis. From WAGR to BEPPS-DIF, we have provided qualified and experienced personnel to tackle the most complex engineering problems in a timely and cost-effective manner.

Penny Nuclear - Stand L10

Penny Nuclear, part of the Penny Hydraulics Group, designs and manufactures mechanical handling solutions for all stages of the nuclear lifecycle. Whether it's for decommissioning, operational, research or new-build sites, we have the knowledge and experience to provide robust, cost-effective solutions within extremely competitive lead-times.

Perma-Fix Environmental Services UK Ltd - Stand E2

Portakabin - Stand B28

Portakabin is the pioneer of modular construction in Europe, delivering interim and permanent bespoke buildings, of any size and to fulfil almost any application, site and design. It has provided award-winning off-site built environments of outstanding quality, with unrivalled on time and on budget performance, for over 50 years.

Porvair Filtration Group LTD - Stand C41

Porvair Filtration Group is an international leader in the development and supply of materials and products for applications in filtration and separation. With a global network of facilities we work in Power Generation, the Fuel Cycle, Decommissioning, Decontamination, Waste Treatment and Waste Disposal with main market leaders.

General Exhibitors

Pöyry Energy - Stand A3

Pöyry is one of Europe's leading nuclear engineering consultants. Pöyry provides:

- Safety case production/review;
- PSA and HAZAN assessments;
- Strategic/options studies;
- Licensing Advice;
- Collection, assessment, verification of radioactive inventory data;
- Consultancy on waste composition/packaging/transport;
- Design and independent review of HVAC Systems;

PPG Coatings Ltd - Stand E7

PPG Manufacture and distribute a range of Protective and Architectural coatings including decontamination and EDF certified products and systems. PPG has a strong history in support and supply into the Nuclear Sector with more than 50% of nuclear sites Globally using PPG coatings.

Procter Johnson - Stand D5

Procter Johnson are a specialised Cement powder blending operation and have the facilities to manufacture bespoke blends for the Nuclear decommissioning industry.

Profile Security Ltd - Stand C17

Profile Security Services, is a privately owned manned guarding company who provide services to the Civil Nuclear Industry and other CNI organisations. We are List N and ISO 27001 accredited, and are previous winners of the NDA Supply Chain Award for 'Enhancing Capability and Capacity'.

Prospect Law Ltd - Stand E4

Prospect Law is a Multi-Disciplinary Practice which has specialist expertise in the infrastructure sector, including extensive experience of advising the nuclear industry at an international level. Through Prospect Advisory it also provides technical, financial and business consultancy services for clients in the UK and across the globe.

PSL Assemblies Ltd - Stand D4

PSL Assemblies Ltd are designers and manufacturers of specialist heatsinks, cooling plates and semiconductor stack assemblies for power electronic applications.

Pwhytek Ltd - Stand M2

PWHytek are an engineering services provider with over 100 years combined experience partnering with companies to produce offloaded packages of design & stress work through to manufacture. We have Catia V5, Solidworks, Unigraphics and MathCAD but we can provide work on additional software packages.

Pycko Scientific Limited - Stand D14

Pycko Scientific are agents for manufacturers of specialist radiological monitoring equipment Including the following:- Model 79 Lightweight Telescopic Probe and Model 30 Small Digital ratemeter, RT30 and the GT40 Hand Held Spectrometer with built in GPS, Tritium Monitors and Alpha Beta Counting Equipment.

QG Business Solutions - Stand D18

If you are looking at developing your supply chain with micro, small and medium sized businesses, visit QG Business Solutions who'll guide you through certification process. #gdpr #cyber #quality

General Exhibitors

Quadrant Security Group Ltd - Stand C33

Quadrant Security Group (QSG) is the leading security system integrator for designing, delivering and maintaining security systems to protect UK Nuclear establishments. QSG have the right credentials and decades of experience working in the sector.

Radwise Limited - Stand N4

Radwise Limited is a UK based Support Services company providing specialist radiological protection services to the UK nuclear industry since 2001. As a Tier 2 supplier we have Frameworks with the NDA & EDF Energy providing services to support decommissioning, operational, outage and project activities.

Radwise Limited - Stand N4

Radwise Limited is a UK based Support Services company providing specialist radiological protection services to the UK nuclear industry since 2001. As a Tier 2 supplier we have Frameworks with the NDA & EDF Energy providing services to support decommissioning, operational, outage and project activities.

Ramco UK Ltd - Stand N10

Rapid Rail GB Limited - Stand E6

Rapid Rail have been designing, supplying and installing Crane Rails, Height Safety Systems and Crane Rail Lubrication System for over 25 years. We are experts with all aspects related to crane rail installation along with visual and instrument surveys, remedial works and consultancy services.

REACT Engineering - Stand F9

REACT we are passionate about making nuclear clean up happen. We take pride in making a real difference for our clients and partners by delivering innovative project management, engineering and technical consultancy services across a broad range of nuclear projects.

Reays Coaches Ltd - Stand C16

Whether it's an 8 seater Mercedes or a 83 seater double decker Reays Coaches really do offer an executive coach for all occasions. We pride ourselves in our excellent track record of customer care, reliability, professionalism, quality of coach and driver that we send to you.

REEL - Stand L3

REEL designs, builds, installs and maintains complex handling systems globally across all stages of the nuclear fuel cycle and is a leader in its field. Our equipment is designed and produced to meet the most extreme operational safety requirements, whilst guaranteeing high levels of operational performance.

REGENESIS UK Ltd - Stand D11

REGENESIS is the world's leading groundwater remediation solutions provider, offering a range of cost-effective, in situ remediation technologies and specialist application services for the treatment of a wide range of contaminants.

Remap - Stand F5

Remap is a national charity with hundreds of volunteers who design and custom-make equipment for disabled people. We help people gain independence and a better quality of life, filling the gap where no suitable equipment is available commercially.

Responsive Ltd - Stand J5

Rider Levett Bucknall UK Ltd - Stand C19

Rider Levett Bucknall is an independent, owner-managed global consultancy delivering commercial management, contract management, project controls and advisory services that support sustainable value realisation to our customers.

Our experience of over 30 years in the Nuclear, Energy and Infrastructure sectors has supported our business growth.

General Exhibitors

ROBATEL Industries - Stand G4

ROBATEL Industries is specialized in the production of transportation and storage casks, lines of Hot cells, interlocks and gloveboxes, Special equipment requiring radiation or thermal shielding, Modular radiation shields, waste treatments.

Roc Technologies - Stand M7

Rovtech Solutions - Stand C25

Rovtech Solutions are Designers and Manufacturers of Harsh Environment Solutions. From 9000m underwater to 1400°C incinerators. Rovtech specialise in Engineering Beyond Arm's Length. Rovtech also supply COTS Cameras, LED Lights, Deployment Poles and Remotely Operated Vehicles

Roxtec UK - Stand C2

We are the world leader in cable and pipe seals. We make sure you can protect life and assets, within the nuclear industry. You can count on us, from design to inspection and throughout the entire lifecycle of your investment.

Royston Lead Limited - Stand J8

Royston manufactures engineered equipment from refined lead. Products include cast lead for roofing, tank and component coatings, shaped ballast and electrolytic cell anodes. Services to the nuclear industry include lead sheet, chevrons and bricks in addition to bespoke shielding, lead filling, composite panels and fabrications.

RPS - Stand H20

RPS is a planning and development, energy and environmental management consultancy. RPS is UK based with over 5,000 staff. RPS has a 25 year track record as a leading provider of nuclear safety case, peer review and supporting services.

Russell Taylor Group - Stand F16

A technical & engineering recruitment agency operating nationally, with a Nuclear Division of 50+ years' combined experience. Our Specialist Consultants cover areas including but not limited too; Commercial, Waste Management, Decommissioning, Radiation Protection, Project Controls, Mechanical, Electrical, Civil, Structural and Process.

RWM - Stand L14

Radioactive Waste Management (RWM) is a subsidiary of the Nuclear Decommissioning Authority (NDA). RWM is responsible for planning and delivering geological disposal of radioactive waste in the UK. Our vision is to create a safer future by managing radioactive waste effectively, to protect people and the environment.

S&H Systems Design and Installation Ltd - Stand G7

S&H Systems Design and Installation Ltd have been producing equipment for the nuclear industry for over 30 years and have a wide range experience in the Design, Manufacture, Installation and Commissioning of quality electrical, instrumentation and pneumatic control systems.

Sarens - Stand K7

Sarens is the recognized worldwide leader and reference in heavy lifting and engineered transport. At Sarens, we have the noble mission to be the reference in crane rental services, heavy lifting, and engineered transport for our clients. With state of the art equipment and value engineering, we offer our clients creative and intelligent solutions to today's heavy lifting and engineered transport challenges.

SC Innovation - Stand L4

SC Innovation is a specialist engineering company delivering comprehensive, cross-sector engineering services and products. We offer a wide range of engineering services, from feasibility studies, initial design support and rapid prototyping, analysis and validation, modelling and simulation, full production and through life support.

General Exhibitors

Sella Controls - Stand D15

SELLA CONTROLS is a specialist independent designer and supplier, delivering; control, safety critical solutions and system integration, from our manufacturing facility, under the control of our QM procedure, which has been approved to BS EN ISO 9001

Sellafield Ltd - Stand C1

Come and visit the Sellafield stand to meet the Supply Chain Development Team and learn “How to do business” with Sellafield Ltd.

Shadow Robot - Stand C25a

Shepley Engineers Ltd - Stand F8

Based in Cumbria we are a multidiscipline contractor/ project manager specialising in Mechanical and Electrical engineering in the nuclear sector. We provide full manufacture, installation and asset care services to the highest quality. We also have decade of experience in Decontamination and Decommissioning within this challenging sector.

SiteFlow - Stand C10

SiteFlow’s solution is aimed at construction and maintenance companies operating on challenging sites. Their collaborative platform is able to digitise site interventions from preparation to execution.

Smartlift Bulk Packaging Ltd - Stand K5

SNC-Lavalin - Stand M4

SNC-Lavalin is a global professional services and project management company and a major player in the ownership of infrastructure. From offices worldwide, our employees are proud to build what matters. In 2017 we acquired Atkins and became one of the most complete nuclear services companies in the world.

Soilutions Ltd - Stand D16

Specialists in contaminated soil and water remediation, environmental consultancy, oil spill response and invasive weeds eradication.

Sonomatic - Stand L12

Sonomatic specialise in Non-Destructive Testing in harsh environments. We are a service company that innovates in the field of inspection and characterisation utilising advanced NDT techniques to gather information on a structure including parts that are inaccessible. Call to discuss your engineering problems.

Sopra Steria - Stand G14

Sopra Steria has brought together systems, technology innovations and process efficiencies in a portfolio of nuclear focused solutions that are supporting transformation across Europe. For our clients and their operational partners, this is bringing multiple benefits and enabling new ways of working.

SSA - Stand B30 and B32

An alliance of the nuclear decommissioning estate’s nine client organisations who collaborate in the procurement of shared goods and services from the supply chain. We also act as the hub to facilitate and integrate supply management, development and engagement activities across the nuclear decommission estate.

Stainless Metalcraft (Chatteris) Ltd - Stand C34

Steel Dynamics Ltd - Stand G1

Steel Dynamics providing profiles & CNC machined parts in stainless steel sheet & plate, from 1000 tonnes of stock in 304, 316, Duplex, Super Duplex & 254SMO; delivering added-value parts with a one touch focus increasing yield, reducing cycle times, manufacturing processes & scrap.

General Exhibitors

Strata Technology Ltd - Stand B10

Strata Technology is an engineering company specialising in the design, build, installation, maintenance and inspection of bespoke laboratory-scale equipment, skid mounted rigs and pilot plants used for research, process development or production purposes. We Engineer Innovation!

Studsvik Ltd - C24

Studsvik Consultancy Services offers a wealth of experience and knowledge through our highly skilled and specialist waste management consultants in the area of Radioactive and NORM waste management both within the nuclear and non-nuclear markets in the UK and internationally.

Symetri Ltd - B19

We challenge people to work smarter for a better future. Helping our customers to adopt CAD/CAM, PDM/PLM, BIM, Scanning, AR/VR and IOT. Symetri enables innovative companies within the Industrial, construction, and property sectors to optimise workflows, facilitate data management and improve quality throughout the design life cycle.

Tannahill Reay Limited - Stand H17

Tannahill Reay Visual Communications Limited is one of the leading creative studios in the United Kingdom specialising in graphic design, exhibition and display, technical 3D modelling & visualisation, computer generated imagery and motion graphics.

Technocover - Stand D8

The Spencer Group - Stand G5

We are a multi-disciplinary privately-owned engineering firm based in Hull. We specialise in large engineering projects ranging from the design and build of green power stations, complex nuclear decommissioning solutions, working across the UK rail network and building and maintaining complex suspension bridges.

Thomas Consulting - Stand G2

Thomas Consulting are Chartered Civil & Structural Engineers. We are UKAS Accredited for our ISO9001, ISO14001 & OHSAS18001 Systems. We have current contracts with EDF Energy, BAE Systems, URENCO and Westinghouse. Our Specialist services include Seismic Qualification of Nuclear Structures using Finite Element Techniques.

Thomas Graham and sons ltd - Stand C18

We are an Independent industrial supplier to the North west and also cover the NDA Estate's through a framework agreement, offering a one stop shop and providing Storage and Supply logistic solutions.

Topspeed Couriers - Stand H6

Topspeed transport radioactive materials under Class 7 of ADR

Tradebe Inutec - Stand H3

Tradebe Inutec provides innovative nuclear waste management processing solutions. Our offsite solutions have provided flexibility for nuclear customers for 35 years. With the most extensive UK authorisations and Safety Case of any UK commercial company, we're a centre of excellence for Problematic and Borderline ILW.

TSP Engineering - Stand B13

TSP Engineering supplies the nuclear sector and other industries offering design/project management, manufacture, refurbishment, electrical engineering, instrumentation and testing operating from one of the largest, most comprehensively equipped workshops in the UK. Floor capacity of 19,200m², 2x5m deep manufacturing pits and lifting capacity of 130T.

General Exhibitors

Turnbull & Scott (Engineers) Ltd - Stand J3

Specialists in heat transfer and recovery, Turnbull & Scott design and manufacture robust, heavy-duty heating and cooling batteries and coils for harsh environments and difficult-to-access locations, air blast coolers, steam condensers, heat recovery economisers, steam pipework systems, hotwell tanks and other custom fabrications.

TÜV SÜD Nuclear Technologies - Stand E10

TUV SUD Nuclear Technologies – Specialist UK based consultancy 45+ employees specialising in:

- Radioactive/environmental waste management
- Radiation physics
- Shielding/criticality design
- Decommissioning strategy development
- Safety case authoring/management
- Optioneering

With an extensive associate base augmenting our in-house capability, plus access to the International TUV SUD group.

TUV UK Limited - Stand C5

TÜV UK Limited, a TÜV Nord Group company, offers its Inspection (UKAS accredited notified body for Rcc-M, PED, PSSR, Welder qualification & welding procedures, ...), Certification (ISO 9001, 14001, 45001, 18001,...) and its unique Specialist Consultancy Services offering into the UK and International Nuclear markets.

Ultra Electronics Energy - Stand L5

Ultra Electronics Energy specialise in the supply of radiation detection systems to the nuclear industry. Product supplied include measurement instruments for dose-rate, contamination and the measurement of radioactive concentration in air and liquids. Ultra supports operating NPP's, fuel cycle facilities and decommissioning projects around the World.

United Kingdom Atomic Energy Authority - Stand B3

UKAEA is the UK's national fusion research lab with a mission to lead the commercial development of fusion power and technologies. JET and MAST operations, combined with onsite fusion facilities, give UKAEA the capability to support realisation of ITER, including wider industry growth and cross fertilisation into nuclear markets such as decommissioning.

URENCO Nuclear Stewardship - Stand C22

URENCO Nuclear Stewardship has been in operation since 2012. We provide responsible materials management and uranic stewardship for the nuclear industry. With the benefit of more than 1,000 combined years of nuclear experience from across our workforce, we have the skills and expertise which enable us to deliver excellence.

VEGA Controls Ltd - Stand H4

VEGA manufacture field instrumentation for level, interface, flow, density and pressure measurement in liquids, solids and gases. EMPHASIS and SIL qualified devices.

VINCI Technology Centre UK Limited - Stand B17

We have been involved with the nuclear industry from the start, having helped develop the first generation of UK nuclear power stations.

Services include:

- Drop testing of nuclear waste flasks
- Condition/Structural surveys and inspections
- Full scale mock-up testing/trials
- Concrete mix design development and production trials

Wälischmiller Engineering GmbH - Stand B24

Planning, development, manufacturing and system integration of remote handling devices and robotic systems, as well as radiation protection devices in the market areas of nuclear research and industry.

Welsh Government - Stand A5

Around 1,500 people are employed within the civil nuclear sector in Wales, and we have a track record of delivering safe nuclear energy, from our sites at Wylfa and Trawsfynydd.

Westinghouse - Stand F10

Westinghouse is the world's pioneering nuclear energy company and a leading supplier of nuclear products and technologies globally. We provide comprehensive, integrated services to the decontamination, decommissioning, remediation and waste management market including handling of spent fuel and treatment, handling and storage of radioactive waste.

Westlakes Engineering Ltd - Stand K8

Westlakes Engineering are award winning Civil and Structural Designer Engineers with our Head Office located at Westlakes Science Park close to Sellafield, Cumbria. We specialise in the Nuclear Sector and specifically Nuclear Decommissioning, Waste Management and Design for Decommissioning.

Wood - Stand H8

Wood draws on decades of experience and proprietary technology to offer innovative solutions that minimise the cost and impact of managing waste streams. Our capabilities include dismantling, remote operations, radioactive waste processing and disposal, site restoration and remediation.

Innovation Zone

A-Safe - Stand i30

We invented the world's first industrial strength polymer safety barrier in 2001, revolutionising workplace safety. We've been improving world standards ever since, introducing ever more advanced safety solutions. Protection, segregation, detection and prevention, with integrated engineering and technological innovation.

Assystem Energy & Infrastructure Limited - Stand i33

Assystem provides consultancy, engineering support and management services to the nuclear industry, both civil and defence, covering the full design cycle from initial new-build concept development through to decommissioning and disposal.

Barrnon - Stand i1

BHR GROUP - Stand i37

A fluids engineering consultancy, BHR Group addresses challenges ranging from sludge mobilisation, fluids characterisation and floc retrieval to wastewater management and remote structure size reduction. Our services include:

- Process optimisation
- Physical testing and measurement
- Computational modelling
- Waterjet cutting
- Surface decontamination

Casella - Stand i23

Monitoring solutions for workplace and environmental health measurement including real time dust monitors, personal air sampling pumps, Sound Level Meters, personal noise dosimeters, hand arm vibration and environmental monitors. Info@casellasolution

Cineon Training - Stand i45

Cineon Training specialises in Immersive Learning and Human Performance. Our aim is to improve performance through evidence-based training. We apply cutting edge research into Virtual Reality and Eye-Tracking to optimise human behaviour. We work with a range of industries including nuclear, petrochemical, military and sport.

Clicks and Links Ltd - Stand i31

CL specialises in immersive technology. We've done work with large infrastructure projects, rail and in nuclear decommissioning, but also provide immersive training experiences for EDF. We have a team of creatives from differing backgrounds with a shared desire to make your work more fun by crafting the best digital experiences.

Cogentus Consulting Limited - Stand i15

Cogentus has products and services for finding innovative solutions to difficult and complex challenges. We run workshops across the world and help our clients to evaluate projects and technologies. We continue to evolve our unique Idea Catalog and class-leading Smart Decisions software products.

Createc - Stand i29

Createc is an innovative technology company using advanced imaging systems to solve some of the challenges in decommissioning and waste management. Createc is working with nuclear facilities in the UK, Europe and the USA, as well as a full programme at Fukushima in Japan

Dalton Nuclear Institute - i27

The Dalton Cumbrian Facility is The University of Manchester's research base for radiation science, nuclear decommissioning engineering and nuclear sector social research. We are a National Nuclear User Facility, part of the Dalton Nuclear Institute, Henry Royce Institute and EPSRC UK National Ion Beam Centre.

Innovation Zone

DAS-ltd- Stand i34

Decision Analysis Services Limited are an independent SME management consultancy specialising in strategy, change, programme management, data analytics and systems engineering. We exist to enable informed and robust decision-making by owners and operators of critical national infrastructure.

EFINOR Limited - Stand i11

EFINOR Limited is an innovative company supporting the Nuclear Industry with high-tech technologies. We are providing special equipment such as shielded forklifts and autoguided vehicles able to perform works and carry heavy loads in ionizing areas.

EneffTech UAV Services - Stand i36

Enefftech UAV Services are your complete solution provider for unmanned aerial vehicles, offering independent drone consultancy - scenario based flight skills training - equipment supply and inspection services to UK nuclear and other energy sectors. Our objective is to mitigate conventional risk, reduce inspection costs and to increase operational efficiency.

First Subsea Ltd - Stand i32

First Subsea is the world's leading developer of subsea connection technology, supplying, installing and decommissioning systems around the world in extreme environments. Developed from mature products designed for safety critical in the offshore Oil & Gas, they have designed and supplied a range of mechanical connectors for Decommissioning.

FIS360 and Game Changers - Stand i7

Game Changers encourages and supports the development of innovative technologies from across industry sectors and academia to meet the complex challenges of nuclear decommissioning. Four projects will be showcased, each demonstrating potential for deployment. Game Changers is a Sellafield initiative delivered by FIS360 Ltd. & NNL.

Imitec - Stand i9

ImiTec specialises in developing and manufacturing novel methods for detecting characterising and visualising/mapping radiation in real-time. ImiTec's Remote Isotopic Analysis System is integrated onto different platforms including UAV's, vehicles, robotic and pipeline inspection systems as well as bespoke systems to address any characterisation challenge.

Innovative Physics - Stand i19

Innovative Physics are a R&D company specializing in radiation detection instruments

IS-Instruments - Stand i40

IS-Instruments develops Raman Spectrometers. Key USPs include

- Making stand-off measurement up to 3 metres
- Advanced data management tools with machine learning
- Portable system with the ability to suppress fluorescence
- Make measurements in nuclear environments.
- Be free standing or ROV mounted

Klauke UK Ltd - Stand i22

German tool manufacturer Klauke produce a certified system for safe cable terminations. Recent advances have allowed certification and remote operation of compression and cutting tools via Bluetooth technology. Compact battery hydraulic solutions can be tailored for specific applications.

Konsolute - Stand i26

Konsolute specialises in Microsoft cloud services and enterprise collaboration platforms, enabling organisations to work smartly and efficiently. Our ex-Microsoft consultants work closely with you to understand your business first and then explore how technology can be tactically used to build a successful digital workplace.

Innovation Zone

Krantz Limited - Stand i5

Krantz develops, designs and manufactures high quality exhaust gas filtration, dampers, clean air solutions and specialist products used in the Nuclear and Plant construction sectors.

Lokring Northern (UK) - Stand i20

The Lokring "Cold Weld" pipe and tube connection offers a permanent mechanical connection to the same integrity as a welded joint. Asme rated, Lokring reduces install costs and time on repair, maintenance and new build projects. Used throughout the Nuclear sector.

Lucideon - Stand i25

Lucideon, the materials development and commercialisation organisation, specialises in materials technologies and processes, enabling the nuclear industry to develop and implement disruptive and innovative waste encapsulation technology platforms. Lucideon has an advanced R&D facility, world-leading material characterisation and testing labs and a pilot/feasibility plant.

Lynkeos Technology Ltd - Stand i38

Lynkeos Technology Ltd is an award-winning Scottish company that specialises in the field of cosmic-ray muography, which uses naturally-occurring background radiation to inspect the contents of complex structures such as nuclear waste containers. In September 2018, Lynkeos established a world-first demonstrator facility at Sellafield.

National Nuclear Laboratory - Stand i41

The National Nuclear Laboratory (NNL) is helping the industry to realise its potential. Our understanding of the science, challenges and opportunities makes NNL a unique authority and partner. We provide experts and access to cutting-edge facilities to harness technologies and translate them into industry-ready solutions.

North West Projects - Stand i2

North West Projects is an engineering design company with a primary focus on the nuclear decommissioning sector. Our core capabilities are the provision of Mechanical and CE&I engineering design and project management. Additional services include Process Engineering, HVAC, and CS&A design.

NSG Environmental Ltd - Stand i44

NSG provides decommissioning, waste management, health physics and R&D services to the nuclear industry. Our core skills are in the management and delivery of solutions using our skilled and experienced consultants, scientists, engineers, hands-on health physics monitors and operatives.

Nuvia - Stand i39

Nuvia is an international engineering, project management and service provider. In the UK and internationally we have been at the forefront of the nuclear industry and have developed a reputation for safe, high quality delivery. Our operations include; turn-key design and build, consultancy, waste management, land remediation, decommissioning and radiation protection.

ONET TECHNOLOGIES - Stand i28

With a workforce of over 2700 employees, ONET Technologies, part of the ONET group, offers its clients integrated services that span the entire lifecycle of nuclear facilities: EPC engineering for new build and customised equipment, maintenance services, operational support, decommissioning/dismantling and clean-up, and waste management.

Orano UK - Stand i43

As a world leader in the nuclear fuel cycle, Orano offers cutting-edge products and services to support nuclear innovation. With 16,000 employees across the globe and an established footprint in the UK, Orano brings decades of operational experience to address the industry's most complex technical challenges.

Innovation Zone

OREKA Solutions - Stand i17

OREKA Solutions, a subsidiary of EDF Group since May 2018, assists nuclear architect engineers optimise the building, maintenance and decommissioning of nuclear installations through the use of innovative nuclear specific software called DEMplus.

Pajarito Scientific Corporation - Stand i42

PSC offers a comprehensive range of solutions to satisfy all kinds of nuclear material characterisation, containment and ventilation requirements. We offer plant-integrated systems, contract measurement services and specialist consultancy.

RED Engineering - Stand i12

RED Engineering rapidly delivers engineering solutions for construction, maintenance and decommissioning projects. We specialise in remote intervention and the use of robot technology to remove personnel from hazardous environments. Our services range from engineering consultancy, the design and build of bespoke equipment to qualification testing.

Satellite Applications Catapult - Stand i16

The Satellite Applications Catapult is an independent innovation and technology company, created to foster growth across the economy through the exploitation of space. We offer world-class facilities and expertise that enable the best businesses, researchers and end-users to work together to develop new satellite-based applications, translating ideas from concept to market in an open innovation environment.
